Companion to: The Small Business AI Automation Operating System (SMALLBIZ-OS-PRO-2026)
Interactive PDF Instructions: Type directly into the interactive AcroForm fields at the bottom of any page or print for tabletop team workshops.

Master Implementation Scoreboard & Workbook Index

Worksheet	Module & Operational Focus	Rollout Status
Worksheet 01	Chapter 1: The Owner's Bottleneck — Mapping the 5-Department Automation Engine	[ ] Not Started [ ] In Progress [ ] Live
Worksheet 02	Chapter 2: The Human-in-the-Loop Architecture — Designing Safe, Zero-Hallucination Workflows	[ ] Not Started [ ] In Progress [ ] Live
Worksheet 03	Chapter 3: The 60-Second Speed-to-Lead & Multi-Channel Intake System	[ ] Not Started [ ] In Progress [ ] Live
Worksheet 04	Chapter 4: Automated Estimating, Quotes & Follow-Up Sequences That Close	[ ] Not Started [ ] In Progress [ ] Live
Worksheet 05	Chapter 5: Frictionless Customer Onboarding, Scheduling & Order Handoffs	[ ] Not Started [ ] In Progress [ ] Live
Worksheet 06	Chapter 6: 24/7 AI Customer Support Triage, FAQ Resolution & Smart Escalation	[ ] Not Started [ ] In Progress [ ] Live
Worksheet 07	Chapter 7: Automated Customer Retention, Review Generation & Reactivation Campaigns	[ ] Not Started [ ] In Progress [ ] Live
Worksheet 08	Chapter 8: Back-Office Autopilot — Invoicing, Payment Chasers, Bookkeeping Prep & Vendor Triage	[ ] Not Started [ ] In Progress [ ] Live
Worksheet 09	Chapter 9: Internal Team SOPs, Meeting Synthesis & Instant Staff Training Systems	[ ] Not Started [ ] In Progress [ ] Live
Worksheet 10	Chapter 10: The 15-Minute Friday Owner Scorecard & 90-Day Automation Rollout Roadmap	[ ] Not Started [ ] In Progress [ ] Live

Worksheet 1: The 5-Day Business Time & Lead-Leak Audit

Companion To: Chapter 1 — *The Owner's Bottleneck: Mapping the 5-Department Automation Engine*
Document Code: `WB-CH01-AUDIT-V1`
Target Completion Time: 15 Minutes Daily (Days 1–5) + 30 Minutes Friday Synthesis
Applicable Team Size: Solo Operator to 25-Person Small Business

---

Executive Instructions: How to Run This Audit Without Slowing Down Your Week

Most small business owners underestimate their repetitive administrative load by 40% to 60% because manual routing happens in two-minute increments throughout the day—answering a quick staff text, copying an email address from a web form into a phone contact, looking up whether an invoice was paid, or typing the same four paragraphs into a customer estimate. Those micro-interruptions fragment deep work and quietly consume 15 to 25 hours every week.

To capture an accurate operational baseline without adding friction to your schedule, follow three rules for the next five business days:

1. **Log in Real Time, Not from Memory on Friday:** Keep this worksheet open on your desk (printed in US Letter/A4 or open inside the Tablet Planner / Excel Command Center). Whenever you or a key team member performs a repetitive task, switches between two software apps to copy-paste data, or answers a recurring question, log it in **Part A** immediately.
2. **Tag Every Entry to One of the 5 Core Departments:** * `Dept 01`: Lead Capture & Speed-to-Lead Intake * `Dept 02`: Sales Qualification, Estimating & Follow-Up * `Dept 03`: Customer Onboarding, Fulfillment & Support Triage * `Dept 04`: Invoicing, Receivables & Back-Office Administration * `Dept 05`: Team SOPs, Delegation & Weekly Executive Reporting
3. **Measure Actual Clock Time on Inbound Leads:** In **Part B**, pull the last 20 inbound inquiries across your phone log, website contact form, email inbox, SMS/WhatsApp, and social media messages. Calculate the exact number of minutes or hours between the timestamp of the customer's inquiry and your company's first meaningful human or automated response.

Part A: Owner & Staff 5-Day Task Friction Log

A.1 Reference Example (Completed Log from an 8-Person Service & Retail Firm)

Review the benchmark rows below before completing your own log in **Section A.2**:

Entry ID	Day & Time Block	Specific Manual Task Description	Dept (01–05)	Software / Channels Touched	Freq / Week	Mins / Event	Weekly Hours (Freq × Mins / 60)	Error / Friction Score (1–5)
EX-01	Mon 08:30 AM	Listening to weekend voicemails, writing down phone numbers, and texting back missed callers manually	Dept 01	VoIP App, iPhone SMS, Google Sheets	22x	6 mins	**2.20 hrs**	5 / 5 (High Lead Loss)
EX-02	Mon 10:15 AM	Copying Typeform/WPForms web inquiries into CRM and sending initial scheduling link email	Dept 01	Email Inbox, HubSpot CRM, Calendly	18x	8 mins	**2.40 hrs**	4 / 5 (4-Hr Delay)
EX-03	Tue 04:45 PM	Building custom 3-option estimates in Word/Docs from rough call notes and emailing PDF	Dept 02	Apple Notes, Word, Gmail, QuickBooks	12x	25 mins	**5.00 hrs**	5 / 5 (Late Evening Work)
EX-04	Wed 11:20 AM	Checking which sent estimates haven't replied after 3–7 days and typing individual follow-up emails	Dept 02	Sent Mail Folder, CRM, SMS	15x	7 mins	**1.75 hrs**	4 / 5 (Often Forgotten)
EX-05	Wed 02:10 PM	Creating client Google Drive folder, copying onboarding checklist, and emailing welcome steps	Dept 03	Stripe, Google Drive, Notion, Gmail	8x	18 mins	**2.40 hrs**	3 / 5 (Missing Files)
EX-06	Thu 09:40 AM	Replying to repetitive customer emails ("What are your hours?", "Where is my order/tech?", "Pricing?")	Dept 03	Shared Inbox, Shopify/Jobber, Instagram	35x	4 mins	**2.33 hrs**	4 / 5 (Constant Interrupts)
EX-07	Fri 01:30 PM	Generating invoices for completed jobs, checking overdue balances, and sending payment reminders	Dept 04	Job Board, QuickBooks/ Xero, Gmail	16x	10 mins	**2.67 hrs**	5 / 5 (Cashflow Drag)

Entry ID	Day & Time Block	Specific Manual Task Description	Dept (01–05)	Software / Channels Touched	Freq / Week	Mins / Event	Weekly Hours (Freq × Mins / 60)	Error / Friction Score (1–5)
EX–08	Fri 04:00 PM	Answering repetitive staff how-to questions and pulling numbers from 4 dashboards for weekly check	Dept 05	Slack/Whats App, Bank, Ads, CRM	10x	15 mins	**2.50 hrs**	4 / 5 (Owner Fatigue)
TOTAL	**5-Day Sample**	**8 Core Repetitive Bottlenecks Logged**	**All 5 Depts**	**12 Disconnected Tools**	**136x / wk**	**—**	**21.25 hrs/wk**	**Avg: 4.25 / 5**

A.2 Your Fillable 5-Day Task Friction Log (Log 15 to 20 Repetitive Workflows)

Use the structured grid below across Monday through Friday. In the `Person Role` column, record whether the task is currently performed by the `Owner`, `Admin/Front-Desk`, `Sales/Account Mgr`, or `Tech/Specialist`.

Row #	Day & Time Block	Person Role (Owner / Staff)	Specific Manual Task Description (What triggers it, and what exact steps do you perform?)	Dept (01–05)	Apps / Channels Touched	Freq / Week (A)	Mins / Event (B)	Weekly Hours (A × B ÷ 60)	Friction & Error Score (1–5)
01	[DAY_TIME_01]	[ROLE_01]	[TASK_DESCRIPTION_01]	[DEPT_01]	[APPS_01]	[FREQ_01]	[MINS_01]	[HRS_01]	[SCORE_01]
02	[DAY_TIME_02]	[ROLE_02]	[TASK_DESCRIPTION_02]	[DEPT_02]	[APPS_02]	[FREQ_02]	[MINS_02]	[HRS_02]	[SCORE_02]
03	[DAY_TIME_03]	[ROLE_03]	[TASK_DESCRIPTION_03]	[DEPT_03]	[APPS_03]	[FREQ_03]	[MINS_03]	[HRS_03]	[SCORE_03]
04	[DAY_TIME_04]	[ROLE_04]	[TASK_DESCRIPTION_04]	[DEPT_04]	[APPS_04]	[FREQ_04]	[MINS_04]	[HRS_04]	[SCORE_04]
05	[DAY_TIME_05]	[ROLE_05]	[TASK_DESCRIPTION_05]	[DEPT_05]	[APPS_05]	[FREQ_05]	[MINS_05]	[HRS_05]	[SCORE_05]

Row #	Day & Time Block	Person Role (`Owner` / `Staff`)	Specific Manual Task Description (What triggers it, and what exact steps do you perform?)	Dept (`01–05`)	Apps / Channels Touched	Freq / Week (`A`)	Mins / Event (`B`)	Weekly Hours (`A × B ÷ 60`)	Friction & Error Score (`1–5`)
06	[DAY_TIME_06]	[ROLE_06]	[TASK_DESCRIPTION_06]	[DEPT_06]	[APPS_06]	[FREQ_06]	[MINS_06]	[HRS_06]	[SCORE_06]
07	[DAY_TIME_07]	[ROLE_07]	[TASK_DESCRIPTION_07]	[DEPT_07]	[APPS_07]	[FREQ_07]	[MINS_07]	[HRS_07]	[SCORE_07]
08	[DAY_TIME_08]	[ROLE_08]	[TASK_DESCRIPTION_08]	[DEPT_08]	[APPS_08]	[FREQ_08]	[MINS_08]	[HRS_08]	[SCORE_08]
09	[DAY_TIME_09]	[ROLE_09]	[TASK_DESCRIPTION_09]	[DEPT_09]	[APPS_09]	[FREQ_09]	[MINS_09]	[HRS_09]	[SCORE_09]
10	[DAY_TIME_10]	[ROLE_10]	[TASK_DESCRIPTION_10]	[DEPT_10]	[APPS_10]	[FREQ_10]	[MINS_10]	[HRS_10]	[SCORE_10]
11	[DAY_TIME_11]	[ROLE_11]	[TASK_DESCRIPTION_11]	[DEPT_11]	[APPS_11]	[FREQ_11]	[MINS_11]	[HRS_11]	[SCORE_11]
12	[DAY_TIME_12]	[ROLE_12]	[TASK_DESCRIPTION_12]	[DEPT_12]	[APPS_12]	[FREQ_12]	[MINS_12]	[HRS_12]	[SCORE_12]
13	[DAY_TIME_13]	[ROLE_13]	[TASK_DESCRIPTION_13]	[DEPT_13]	[APPS_13]	[FREQ_13]	[MINS_13]	[HRS_13]	[SCORE_13]
14	[DAY_TIME_14]	[ROLE_14]	[TASK_DESCRIPTION_14]	[DEPT_14]	[APPS_14]	[FREQ_14]	[MINS_14]	[HRS_14]	[SCORE_14]
15	[DAY_TIME_15]	[ROLE_15]	[TASK_DESCRIPTION_15]	[DEPT_15]	[APPS_15]	[FREQ_15]	[MINS_15]	[HRS_15]	[SCORE_15]
SUM	**5-Day Audit**	**All Roles**	**Total Weekly Repetitive Manual Hours Logged**	**01–05**	**—**	**[SUM_FREQ]**	**—**	**[TOTAL_WEEKLY_HOURS]**	**Avg: [AVG_SCORE]**

A.3 Department Hours Roll-Up Summary

Group your logged hours from **Section A.2** by department to reveal which operational engine is consuming the largest share of your payroll and personal bandwidth:

Department Code & Name	Total Weekly Owner Hours	Total Weekly Staff Hours	Combined Weekly Hours	% of Total Manual Load
`Dept 01` : Lead Capture & Speed-to-Lead Intake	`[D1_OWNER_HRS]`	`[D1_STAFF_HRS]`	`[D1_TOTAL_HRS]`	`[D1_PCT]%`
`Dept 02` : Sales Qualification, Estimating & Follow-Up	`[D2_OWNER_HRS]`	`[D2_STAFF_HRS]`	`[D2_TOTAL_HRS]`	`[D2_PCT]%`
`Dept 03` : Customer Onboarding, Fulfillment & Support	`[D3_OWNER_HRS]`	`[D3_STAFF_HRS]`	`[D3_TOTAL_HRS]`	`[D3_PCT]%`
`Dept 04` : Invoicing, Receivables & Back-Office Admin	`[D4_OWNER_HRS]`	`[D4_STAFF_HRS]`	`[D4_TOTAL_HRS]`	`[D4_PCT]%`
`Dept 05` : Team SOPs, Delegation & Weekly Reporting	`[D5_OWNER_HRS]`	`[D5_STAFF_HRS]`	`[D5_TOTAL_HRS]`	`[D5_PCT]%`
COMBINED 5-DEPARTMENT TOTAL	**`[SUM_OWNER_HRS]`**	**`[SUM_STAFF_HRS]`**	**`[TOTAL_WEEKLY_HOURS]`**	**100.0%**

*(Tip: You can paste your raw notes from Section A.2 directly into **Prompt 1.1** in Chapter 1 to automatically categorize, sum, and calculate your departmental labor drag.)*

Part B: Inbound Lead-Leak & Speed-to-Lead Diagnostic Audit

Every minute that passes between a prospect's initial inquiry and your company's response reduces your probability of booking that job or consultation. Complete the channel audit below using your actual call logs, inbox timestamps, and CRM records from the past 30 days.

B.1 Channel-by-Channel Response Time & Drop-Off Table

Inbound Lead Channel	Total Monthly Inquiries (`M`)	Avg Daytime Response Time (Mins / Hrs)	Avg After-Hours / Weekend Response Time	% Missed, Unanswered, or Replied > 1 Hour (`L%`)	Monthly Delayed / Missed Leads (`M × L%`)	Current Automated Instant Reply? (`Yes` / `No`)
1. Inbound Phone Calls / Missed Calls	`[CALL_VOL]`	`[CALL_DAY_SLA]`	`[CALL_NIGHT_SLA]`	`[CALL_LEAK_PCT]%`	`[CALL_MISSED_COUNT]`	`[CALL_AUTO_STATUS]`

Inbound Lead Channel	Total Monthly Inquiries (`M`)	Avg Daytime Response Time (Mins / Hrs)	Avg After-Hours / Weekend Response Time	% Missed, Unanswered, or Replied > 1 Hour (`L%`)	Monthly Delayed / Missed Leads (`M × L%`)	Current Automated Instant Reply? (`Yes` / `No`)
2. Website Contact / Quote Request Forms	`[FORM_VOL]`	`[FORM_DAY_SLA]`	`[FORM_NIGHT_SLA]`	`[FORM_LEAK_PCT]%`	`[FORM_MISSED_COUNT]`	`[FORM_AUTO_STATUS]`
3. Direct Inbound Emails (`info@` / `sales@`)	`[EMAIL_VOL]`	`[EMAIL_DAY_SLA]`	`[EMAIL_NIGHT_SLA]`	`[EMAIL_LEAK_PCT]%`	`[EMAIL_MISSED_COUNT]`	`[EMAIL_AUTO_STATUS]`
4. SMS / WhatsApp / Google Business Chat	`[SMS_VOL]`	`[SMS_DAY_SLA]`	`[SMS_NIGHT_SLA]`	`[SMS_LEAK_PCT]%`	`[SMS_MISSED_COUNT]`	`[SMS_AUTO_STATUS]`
5. Social DMs (Instagram / FB / LinkedIn)	`[DM_VOL]`	`[DM_DAY_SLA]`	`[DM_NIGHT_SLA]`	`[DM_LEAK_PCT]%`	`[DM_MISSED_COUNT]`	`[DM_AUTO_STATUS]`
6. Third-Party Lead Portals / Directories	`[PORTAL_VOL]`	`[PORTAL_DAY_SLA]`	`[PORTAL_NIGHT_SLA]`	`[PORTAL_LEAK_PCT]%`	`[PORTAL_MISSED_COUNT]`	`[PORTAL_AUTO_STATUS]`
TOTAL MONTHLY INBOUND PIPELINE	**`[TOTAL_LEADS_M]`**	**Avg: `[AVG_DAY_SLA]`**	**Avg: `[AVG_NIGHT_SLA]`**	**Avg: `[AVG_LEAK_PCT]%`**	**`[TOTAL_MISSED_LEADS]`**	**Target: < 60 Secs**

B.2 Monthly & Annual Leaked Revenue Calculator

Use your total delayed/missed leads from **Section B.1** (`[TOTAL_MISSED_LEADS]`) to quantify how much gross revenue is escaping before your sales process even begins:

1. **Total Monthly Delayed or Unanswered Leads (`Line B1`):** `[TOTAL_MISSED_LEADS]` leads/month
2. **Historical Close Rate When Contacted Under 5 Minutes (`Line B2`):** `[CLOSE_RATE_DECIMAL]` *(e.g., enter `0.25` for 25%)*
3. **Conservative Recovery Factor via 60-Second Automation (`Line B3`):** `0.60` *(assumes 60% of previously leaked leads engage when texted/emailed within 60 seconds)*

4. **Recoverable New Customers per Month (`Line B4 = B1 × B2 × B3`):** `[RECOVERABLE_CUSTOMERS_MO]` customers/month
5. **Average First-Year Customer Value / LTV (`Line B5`):** `$[AVG_CUSTOMER_LTV]`
6. **Monthly Leaked Revenue (`Line B6 = B4 × B5`):** `$[MONTHLY_LEAKED_REV]` / month
7. **Annualized Leaked Revenue (`Line B7 = B6 × 12`): `$[ANNUAL_LEAKED_REV]` / year**

Part C: Cost of Manual Friction (CMF) Master Worksheet

Combine your labor hours from **Part A**, your leaked lead revenue from **Part B**, and your overdue invoice write-offs/carrying cost to compute your company's total **Annual Cost of Manual Friction (CMF)**.

C.1 The Master CMF Formula

```
Annual CMF = \underbrace{(Weekly Manual Hours × Blended Hourly Rate × 52) {Component 1: Annual Manual Labor Tax + \underbrace{(Monthly Missed Leads × Net Close Rate × Customer LTV × 12) {Component 2: Annual Speed-to-Lead Revenue Leak + \underbrace{(Monthly Late/Uncollected Billing × Write-Off \& Drag Rate × 12) {Component 3: Annual Receivables & Billing Leak
```

C.2 Worked Example vs. Your Business Calculation Grid

CMF Calculation Line Item	Formula / Reference	Worked Benchmark (10-Person Service Firm)	Your Business Figures
1. Weekly Owner Manual Admin Hours	From Part A.3 (`[SUM_OWNER_HRS]`)	`14.5 hrs/wk`	`[YOUR_OWNER_HRS] hrs/wk`
2. Owner Effective Hourly Value	Target Annual Comp ÷ 2,000 hrs (Min `$75–$150/hr`)	`$95.00 / hr`	`$[YOUR_OWNER_RATE] / hr`
3. Weekly Staff Manual Admin Hours	From Part A.3 (`[SUM_STAFF_HRS]`)	`11.0 hrs/wk`	`[YOUR_STAFF_HRS] hrs/wk`
4. Staff Fully Burdened Hourly Rate	Base Wage + 22% Taxes/Benefits	`$32.00 / hr`	`$[YOUR_STAFF_RATE] / hr`
5. Weekly Blended Labor Cost	`(Line 1 × Line 2) + (Line 3 × Line 4)`	`$1,729.50 / wk`	`$[YOUR_WEEKLY_LABOR_COST] / wk`
COMPONENT 1: ANNUAL MANUAL LABOR TAX	**`Line 5 × 52 Weeks`**	**`$89,934.00 / yr`**	**`$[YOUR_ANNUAL_LABOR_TAX] / yr`**
6. Monthly Delayed / Missed Inbound Leads	From Part B.1 (`[TOTAL_MISSED_LEADS]`)	`28 leads / mo`	`[YOUR_MISSED_LEADS] leads / mo`

CMF Calculation Line Item	Formula / Reference	Worked Benchmark (10-Person Service Firm)	Your Business Figures
7. Recoverable Conversion Rate (Net)	`Close Rate (0.25) × Recovery Factor (0.60)`	`15.0% (4.2 jobs/mo)`	`[YOUR_NET_RECOVERY_PCT]%`
8. Average Customer LTV / Job Value	From Part B.2 (`Line B5`)	`$1,850.00`	`$[YOUR_LTV]`
COMPONENT 2: ANNUAL LEAD-LEAK LOSS	**`Line 6 × Line 7 × Line 8 × 12 Months`**	**`$93,240.00 / yr`**	**`$[YOUR_ANNUAL_LEAD_LOSS] / yr`**
9. Monthly Delayed / Overdue Receivables (>30d)	Average Monthly Uncollected AR Balance	`$22,000.00 / mo`	`$[YOUR_MONTHLY_OVERDUE_AR] / mo`
10. Bad-Debt Write-Off & Unbilled Scope Rate	Uncollected % + Unbilled Change Orders (`4%–8%`)	`5.5% ($1,210/mo)`	`[YOUR_AR_LOSS_PCT]%`
COMPONENT 3: ANNUAL RECEIVABLES LEAK	**`Line 9 × Line 10 × 12 Months`**	**`$14,520.00 / yr`**	**`$[YOUR_ANNUAL_AR_LOSS] / yr`**
TOTAL ANNUAL COST OF MANUAL FRICTION (CMF)	**`Component 1 + Component 2 + Component 3`**	**`$197,694.00 / yr`**	**`$[YOUR_TOTAL_ANNUAL_CMF] / yr`**
CONSERVATIVE 65% AUTOMATION RECOVERY TARGET	**`Total Annual CMF × 0.65`**	**`$128,501.10 / yr`**	**`$[YOUR_65PCT_RECOVERY_TARGET] / yr`**

Part D: The A.U.T.O. Prioritization Matrix (Selecting Your Top 3 Quick Wins)

Never attempt to automate all 15 manual tasks simultaneously. Take your top 10 friction items from **Part A** and **Part B**, and score each candidate workflow from **1 to 10** across the four **A.U.T.O.** criteria (Maximum Score = `40 Points`):

- `A` **— Annual Financial Impact (`1–10`):** Does automating this workflow directly recover leaked leads (`Dept 01–02`), accelerate cash collection (`Dept 04`), or save `3+ hours/week` of high-cost owner time (`10 = >$15,000/yr impact` ; `1 = <$1,000/yr impact`)?
- `U` **— Urgency & Weekly Frequency (`1–10`):** How often does this trigger fire? (`10 = Daily / 15+ times per week where speed-to-response matters` ; `5 = Weekly` ; `1 = Monthly/Quarterly`).
- `T` **— Technical Simplicity (`1–10`):** Can this be built using standard webhooks, native CRM triggers, and a single structured AI prompt without custom software coding (`10 = 2-step trigger + prompt + SMS/email` ; `5 = Multi-step conditional router` ; `1 = Legacy closed software with no API/email export`)?
- `O` **— Operational Safety (`1–10`):** How safe is this workflow against customer-facing errors when paired with a T.R.A.V. gate (`10 = Internal prep, draft generation, or standardized acknowledgement` ; `5 =`

Requires 1-click Amber human approval; 1 = High legal/clinical liability if unreviewed)?

D.1 Candidate Workflow Scoring Grid

Rank	Candidate Workflow Name	Dept (01–05)	A Cost Impact (1–10)	U Frequency (1–10)	T Simplicity (1–10)	O Safety (1–10)	Total A.U.T.O. Score (/40)	Execution Gate (Green Auto / Amber Draft)	Rollout Sprint (Sprint 1: Days 1–30 / Sprint 2: Days 31–60 / Sprint 3: Days 61–90)
Ex. 1	*Instant Missed-Call & Web Form 60-Sec SMS Intake*	Dept 01	10	10	9	9	38 / 40	Green Auto	**Sprint 1 (Week 1)**
Ex. 2	*3-Option Quote Draft + 14-Day Follow-Up Sequence*	Dept 02	9	8	8	8	33 / 40	Amber Draft	**Sprint 1 (Week 2)**
Ex. 3	*5-Stage Polite Overdue Invoice Payment Chaser*	Dept 04	8	8	9	9	34 / 40	Green Auto	**Sprint 1 (Week 3)**
01	[CANDIDATE_WORKFLOW_01]	[DEPT_C01]	[A_01]	[U_01]	[T_01]	[O_01]	[TOTAL_01] / 40	[GATE_01]	[SPRINT_01]
02	[CANDIDATE_WORKFLOW_02]	[DEPT_C02]	[A_02]	[U_02]	[T_02]	[O_02]	[TOTAL_02] / 40	[GATE_02]	[SPRINT_02]
03	[CANDIDATE_WORKFLOW_03]	[DEPT_C03]	[A_03]	[U_03]	[T_03]	[O_03]	[TOTAL_03] / 40	[GATE_03]	[SPRINT_03]

Rank	Candidate Workflow Name	Dept (01–05)	A Cost Impact (1–10)	U Frequency (1–10)	T Simplicity (1–10)	O Safety (1–10)	Total A.U.T.O. Score (/40)	Execution Gate (Green Auto / Amber Draft)	Rollout Sprint (Sprint 1: Days 1–30 / Sprint 2: Days 31–60 / Sprint 3: Days 61–90)
04	[CANDIDATE_WORKFLOW_04]	[DEPT_C04]	[A_04]	[U_04]	[T_04]	[O_04]	[TOTAL_04] / 40	[GATE_04]	[SPRINT_04]
05	[CANDIDATE_WORKFLOW_05]	[DEPT_C05]	[A_05]	[U_05]	[T_05]	[O_05]	[TOTAL_05] / 40	[GATE_05]	[SPRINT_05]
06	[CANDIDATE_WORKFLOW_06]	[DEPT_C06]	[A_06]	[U_06]	[T_06]	[O_06]	[TOTAL_06] / 40	[GATE_06]	[SPRINT_06]
07	[CANDIDATE_WORKFLOW_07]	[DEPT_C07]	[A_07]	[U_07]	[T_07]	[O_07]	[TOTAL_07] / 40	[GATE_07]	[SPRINT_07]
08	[CANDIDATE_WORKFLOW_08]	[DEPT_C08]	[A_08]	[U_08]	[T_08]	[O_08]	[TOTAL_08] / 40	[GATE_08]	[SPRINT_08]
09	[CANDIDATE_WORKFLOW_09]	[DEPT_C09]	[A_09]	[U_09]	[T_09]	[O_09]	[TOTAL_09] / 40	[GATE_09]	[SPRINT_09]
10	[CANDIDATE_WORKFLOW_10]	[DEPT_C10]	[A_10]	[U_10]	[T_10]	[O_10]	[TOTAL_10] / 40	[GATE_10]	[SPRINT_10]

D.2 Decision Rule for Your Scores

- **Score 32–40 (Priority Tier 1 — Immediate 30-Day Quick Wins):** Select your **Top 3 highest-scoring workflows** from this band for immediate deployment over the next 30 days.
- **Score 24–31 (Priority Tier 2 — Days 31–60 Rollout):** Standardize the underlying checklist now, and schedule technical buildout only after your Top 3 Quick Wins are live and verified.
- **Score < 24 (Priority Tier 3 — Eliminate or Defer):** Do not spend automation engineering hours here. Either eliminate the task completely or delegate it using a simple 5-minute Loom checklist.

Part E: Week 1 Sign-Off & Baseline KPI Snapshot

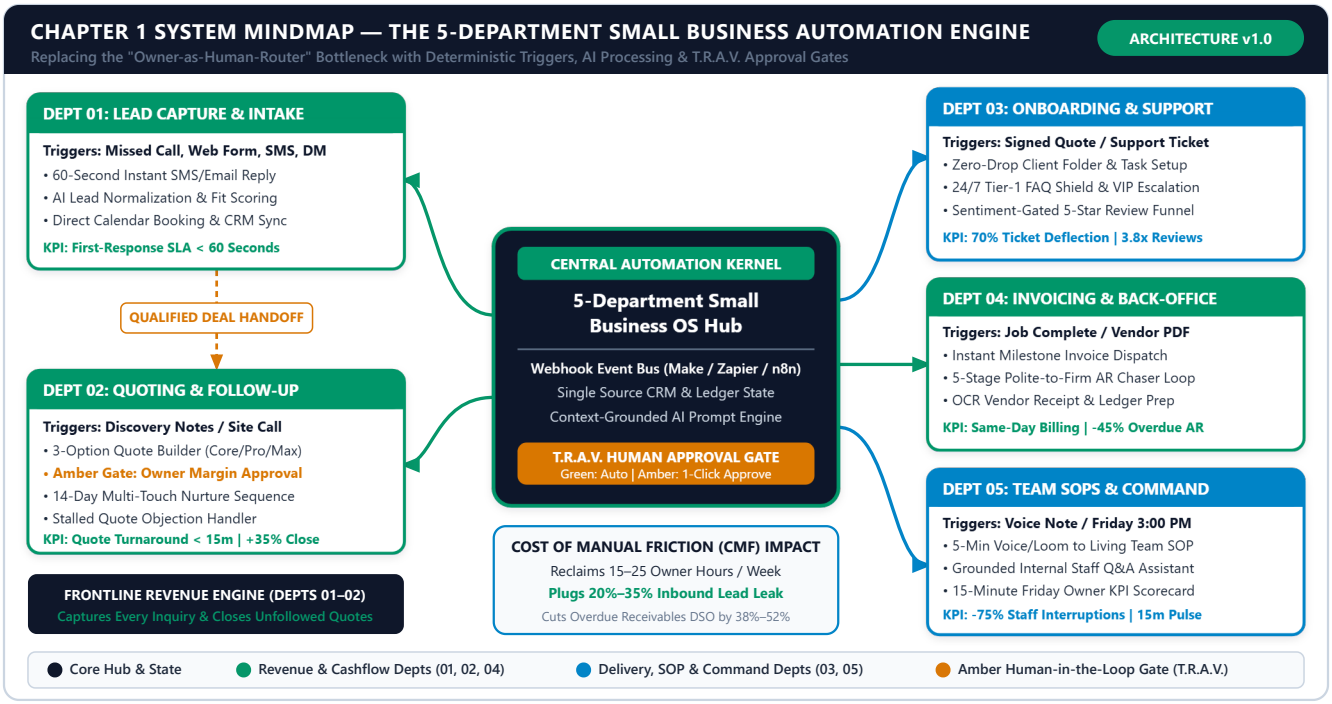

Lock in your pre-automation baseline below so you can measure your exact weekly time savings and revenue recovery on your **Friday Owner Scorecard** (Chapter 10):

Baseline Operational Metric	Pre-Automation Baseline (Today)	30-Day Sprint Target	90-Day OS Target
1. Owner Weekly Repetitive Admin Hours	`[BASELINE_OWNER_HRS]` hrs/wk	`-40%` (`[TARGET_30D_HRS]` hrs/wk)	`-75%` (`< 5.0 hrs/wk`)
2. Median Daytime Lead Response Time	`[BASELINE_LEAD_SLA]` mins/hrs	`< 60 Seconds` (Automated SMS/Email)	`< 45 Seconds` (24/7 All Channels)
3. % of Sent Quotes Receiving 5+ Follow-Ups	`[BASELINE_FOLLOWUP_PCT]%`	`85%+` Automated Sequence	`100%` Multi-Touch Nurture
4. Average Days Sales Outstanding (DSO)	`[BASELINE_DSO_DAYS]` days	`-25%` (`[TARGET_30D_DSO]` days)	`< 14 Days` (Auto AR Chasers)
5. Total Annual Cost of Manual Friction (CMF)	**`$[YOUR_TOTAL_ANNUAL_CMF] / yr`**	**Recover `$[TARGET_30D_SAVINGS]/yr`**	**Recover `$[YOUR_65PCT_RECOVERY_TARGET]/yr`**

Audit Completed By: `[OWNER_OR_OPS_LEAD_NAME]`
Business Name: `[BUSINESS_NAME]`
Baseline Lock Date: `[AUDIT_COMPLETION_DATE]`
Top 3 Selected Sprint-1 Workflows:

1. `[SPRINT_1_WORKFLOW_1]` (`Dept [S1_D1]` — A.U.T.O. Score: `[S1_SCORE_1]/40`)
2. `[SPRINT_1_WORKFLOW_2]` (`Dept [S1_D2]` — A.U.T.O. Score: `[S1_SCORE_2]/40`)
3. `[SPRINT_1_WORKFLOW_3]` (`Dept [S1_D3]` — A.U.T.O. Score: `[S1_SCORE_3]/40`)

Worksheet 2: Workflow Risk & Automation Readiness Scorecard

Companion To: Chapter 2 — *The "Human-in-the-Loop" Architecture: Designing Safe, Zero-Hallucination Workflows*
Document Code: `WB-CH02-TRAV-V1`
Target Completion Time: 30 Minutes per Department Rollout
Applicable Team Size: Solo Operator to 25-Person Small Business

---

Executive Instructions: Enforcing the T.R.A.V. Gate Before Any Workflow Goes Live

The single greatest risk in small business automation is connecting a raw language model directly to a live customer communication channel without deterministic rules, grounding tables, and human verification boundaries. A single hallucinated discount, invented clinical instruction, or double-fired webhook can destroy years of local reputation in thirty seconds.

Every automated workflow in your company must pass through **The T.R.A.V. Safety Architecture** documented on this scorecard before switching from `Sandbox Test Mode` to `Live Production Mode`:

1. `[T]` **Trigger Standardization:** Deduplicate webhooks using an idempotency hash (`event_hash`), normalize phone numbers (`E.164`), validate timestamps (`ISO-8601`), and reject malformed payloads before calling any AI endpoint.
2. `[R]` **Rules & Deterministic Context Grounding:** Run hard-coded filters (blocklists, business hours, numeric margin floors, regex keyword triggers) *before* AI inference, and inject only verified company pricing tables and approved SOP snippets (`temperature: 0.0-0.2`).
3. `[A]` **AI Processing with Strict JSON Schema Enforcement:** Require the model to output a structured JSON payload containing `confidence_score` , `risk_tier` , `policy_check_passed` , `draft_response` , and `escalation_reason` .
4. `[V]` **Verification & 3-Zone Routing Gate:** Route every output deterministically into **Green Zone** (`Auto-Execute`), **Amber Zone** (`One-Click Staff Approval Card`), or **Red Zone** (`Immediate Human Takeover`), backed by a **Dead-Letter Fallback Queue**.

Part A: The 3-Zone Risk Classification Matrix (15 Common SMB Workflows + Your Custom Rows)

A.1 Reference Benchmark: How to Score Risk Across 15 Standard Small Business Workflows

Every workflow is evaluated across four risk factors on a `1–5` scale (`1 = Minimal Risk`, `5 = Severe Exposure`), producing a **Total Risk Score (`4–20 Points`)**: * **Factor 1 — Financial Exposure (`1–5`):** Does the action commit pricing, discounts, refunds, or vendor payments? (`1 = $0 commitment`; `3 = Standard fixed-price SKU <$500`; `5 = Custom quote >$1,000, refund, or contract pricing`). * **Factor 2 — Legal, Clinical & Regulatory Liability (`1–5`):** Could an error violate medical privacy, legal ethics, safety codes, or A2P SMS consent? (`1 = Internal operational note`; `3 = Standard customer scheduling`; `5 = Medical/legal advice, contract terms, or dispute`). * **Factor 3 — Reputational & Brand Sensitivity (`1–5`):** What happens if the tone is slightly off? (`1 = Internal staff checklist`; `3 = Routine prospect intake`; `5 = Angry customer complaint, 1-star review threat, or VIP partner`). * **Factor 4 — Input Ambiguity (`1–5`):** How structured is the incoming data? (`1 = Fixed web form dropdowns`; `3 = Short SMS inquiry`; `5 = Multi-page unstructured custom RFP or emotional email`).

Deterministic Routing Thresholds: * **Total Risk Score `4–8` (and Financial Exposure `≤ 2`): GREEN ZONE** (`100% Unattended Auto-Execution`). * **Total Risk Score `9–14` (or Financial Exposure `3–4`): AMBER ZONE** (`AI Drafts 95% → 1-Click Slack/SMS/Email Human Approval`). * **Total Risk Score `15–20` (or Any Single Factor `== 5` on Legal/Dispute): RED ZONE** (`Lock Automated Reply → Immediate Human Takeover Alert`).

Ref #	Standard Small Business Workflow	Dept	Fin. (`1–5`)	Legal (`1–5`)	Brand (`1–5`)	Input (`1–5`)	Total Risk (`/20`)	Assigned T.R.A.V. Zone	Required Approval Mechanism
`BM-01`	Missed-Call 60-Second SMS Intake Concierge	`01`	`1`	`1`	`2`	`2`	`6 / 20`	**GREEN ZONE**	Auto-Execute (A2P Opt-In Verified)
`BM-02`	Website Contact Form CRM Normalization & Dedup	`01`	`1`	`1`	`1`	`1`	`4 / 20`	**GREEN ZONE**	Auto-Execute (Internal DB Write)
`BM-03`	Standard Fixed-Fee Inspection / Consult Booking	`01`	`2`	`1`	`2`	`2`	`7 / 20`	**GREEN ZONE**	Auto-Execute (Calendar Buffer Locked)
`BM-04`	Custom 3-Tier Proposal / Estimate Generation	`02`	`4`	`3`	`3`	`3`	`13 / 20`	**AMBER ZONE**	1-Click Owner/Estimator Slack Card
`BM-05`	14-Day Pre-Approved Quote Follow-Up Sequence	`02`	`1`	`1`	`2`	`1`	`5 / 20`	**GREEN ZONE**	Auto-Execute (With Stop-on-Reply Hook)

Ref #	Standard Small Business Workflow	Dept	Fin. (1–5)	Legal (1–5)	Brand (1–5)	Input (1–5)	Total Risk (/20)	Assigned T.R.A.V. Zone	Required Approval Mechanism
BM-06	Prospect Price Objection & Scope Reduction Re-Quote	02	4	2	3	4	13 / 20	**AMBER ZONE**	1-Click Approval of Revised Tier-1 Scope
BM-07	Signed Quote to Client Folder & Task Board Setup	03	1	1	1	1	4 / 20	**GREEN ZONE**	Auto-Execute (Internal Provisioning)
BM-08	Tier-1 FAQ Reply (Hours, Address, Parking, Status)	03	1	1	2	2	6 / 20	**GREEN ZONE**	Auto-Execute (Confidence ≥ 0.90)
BM-09	Customer Refund, Credit Memo, or Warranty Claim	03	4	3	4	3	14 / 20	**AMBER ZONE**	Manager 1-Click Approval (<$250 cap)
BM-10	Angry Customer Threatening Chargeback / Lawsuit	03	5	5	5	4	19 / 20	**RED ZONE**	Halt Bot -> Instant Owner Phone/Slack Alert
BM-11	Post-Service Sentiment Check & 5-Star Review Ask	03	1	1	2	1	5 / 20	**GREEN ZONE**	Auto-Execute (Sub-4-Star Routes to Amber)
BM-12	Completed Milestone to Draft Invoice Line Items	04	3	2	2	2	9 / 20	**AMBER ZONE**	Bookkeeper/Owner 1-Click Batch Approve
BM-13	Standard Overdue Invoice Reminders (Day -3 to +14)	04	2	1	2	1	6 / 20	**GREEN ZONE**	Auto-Execute (Verified Unpaid Balance)
BM-14	Vendor PDF Invoice OCR Extraction to Staging Table	04	2	2	1	2	7 / 20	**GREEN ZONE**	Auto-Stage as Draft Bill (Human Pays)
BM-15	5-Min Voice Memo to Internal Team SOP & Friday KPI	05	1	1	1	2	5 / 20	**GREEN ZONE**	Auto-Execute (Internal Workspace Only)

A.2 Your Custom Workflow Risk Scoring Grid

Score the specific workflows you selected in `Worksheet 1` before building them:

Row #	Your Custom Workflow Name	Dept (`01–05`)	Fin. (`1–5`)	Legal (`1–5`)	Brand (`1–5`)	Input (`1–5`)	Total Score (`/20`)	Assigned Zone (`Green` / `Amber` / `Red`)	Designated Human Approver (If Amber/Red)
CW-01	[CUSTOM_WORKFLOW_NAME_01]	[D_01]	[F_01]	[L_01]	[B_01]	[I_01]	[TOT_01]/20	[ZONE_01]	[APPROVER_ROLE_01]
CW-02	[CUSTOM_WORKFLOW_NAME_02]	[D_02]	[F_02]	[L_02]	[B_02]	[I_02]	[TOT_02]/20	[ZONE_02]	[APPROVER_ROLE_02]
CW-03	[CUSTOM_WORKFLOW_NAME_03]	[D_03]	[F_03]	[L_03]	[B_03]	[I_03]	[TOT_03]/20	[ZONE_03]	[APPROVER_ROLE_03]
CW-04	[CUSTOM_WORKFLOW_NAME_04]	[D_04]	[F_04]	[L_04]	[B_04]	[I_04]	[TOT_04]/20	[ZONE_04]	[APPROVER_ROLE_04]
CW-05	[CUSTOM_WORKFLOW_NAME_05]	[D_05]	[F_05]	[L_05]	[B_05]	[I_05]	[TOT_05]/20	[ZONE_05]	[APPROVER_ROLE_05]
CW-06	[CUSTOM_WORKFLOW_NAME_06]	[D_06]	[F_06]	[L_06]	[B_06]	[I_06]	[TOT_06]/20	[ZONE_06]	[APPROVER_ROLE_06]
CW-07	[CUSTOM_WORKFLOW_NAME_07]	[D_07]	[F_07]	[L_07]	[B_07]	[I_07]	[TOT_07]/20	[ZONE_07]	[APPROVER_ROLE_07]
CW-08	[CUSTOM_WORKFLOW_NAME_08]	[D_08]	[F_08]	[L_08]	[B_08]	[I_08]	[TOT_08]/20	[ZONE_08]	[APPROVER_ROLE_08]

Part B: The T.R.A.V. Gate Architecture Design Canvas

Complete one design canvas below for each of your **Top 3 Sprint-1 Workflows** before activating live customer webhooks:

T.R.A.V. Architectural Layer	Specification Question	Your Production Configuration
Workflow Header	**Workflow ID & Name:**	`[WORKFLOW_ID_AND_NAME]`
1. `[T]` Trigger Standardization	**Source Webhook / App Trigger:**	`[SOURCE_WEBHOOK_APP]`
1. `[T]` Idempotency Key Formula	How do we block duplicate webhooks within 60 seconds?	`SHA256([CONTACT_PHONE_OR_EMAIL] + [EVENT_TYPE] + [MINUTE_BUCKET])`
1. `[T]` Required Non-Null Fields	Which fields must exist before proceeding?	`[REQUIRED_FIELDS_LIST]` *(e.g., `phone_e164` OR `email`, `timestamp_utc`)*
2. `[R]` Deterministic Pre-Filters	What code/regex filter runs *before* the AI prompt?	`[PRE_FILTER_RULES]` *(e.g., block `noreply@`, check Red-Zone keywords)*
2. `[R]` Red-Zone Trigger Keywords	Which exact words force an immediate Red-Zone stop?	`lawyer, attorney, lawsuit, sue, BBB, fraud, chargeback, emergency, injury, bleeding, gas leak, fire`
2. `[R]` Grounded Reference Table	Which exact pricebook or SOP table is injected?	`[GROUNDED_SOURCE_TABLE_ID]`
2. `[R]` Model Temperature Setting	What temperature is enforced on the API call?	`0.1` *(Strict factual determinism; never exceed `0.2`)*
3. `[A]` Required JSON Output Keys	Which JSON keys must the AI return?	`confidence_score`, `risk_tier`, `policy_check_passed`, `draft_response`, `escalation_reason`
3. `[A]` Negative Prompt Guardrails	What is the AI strictly forbidden from stating?	`Never invent discounts, never quote off-menu SKUs, never promise exact arrival times without calendar check, never give legal/medical advice.`
4. `[V]` Green-Zone Auto Threshold	When does this run 100% unattended?	`risk_tier == "GREEN" AND confidence_score ≥ 0.90 AND policy_check_passed == true`
4. `[V]` Amber-Gate Channel & SLA	Where does the 1-click approval card go, and what is the timeout?	Channel: `[SLACK_OR_SMS_CHANNEL]` | Escalation if unapproved after: `[TIMEOUT_MINS]` mins

T.R.A.V. Architectural Layer	Specification Question	Your Production Configuration
4. `[V]` Dead-Letter Fallback Action	What happens if the LLM API times out or returns invalid JSON?	Route payload to `[DEAD_LETTER_SHEET_OR_TABLE]`, send static safe acknowledgement, and alert `[OPS_LEAD_CONTACT]`.

Part C: Deterministic Pre-Flight Validator & Grounding Checklist

Before any AI-generated draft is sent to a customer (in Green Zone) or presented to staff (in Amber Zone), verify that your automation bridge enforces these **8 Pre-Flight Code Checks**:

- [ ] **Check 1 — Valid JSON Parse:** Does the automation bridge wrap the AI response in a JSON parser node with an error-routing branch to the Dead-Letter Queue?
- [ ] **Check 2 — Numeric Price & Discount Bounds:** If the workflow outputs a dollar amount, does a deterministic formula node verify that `quoted_total ≥ minimum_pricebook_floor` and `discount_pct ≤ max_allowed_discount` (`Prompt 2.4`)?
- [ ] **Check 3 — Competitor & Forbidden Word Filter:** Does a regex filter verify that the outbound draft contains zero competitor brand names, zero internal markup percentages, and zero banned AI clichés?
- [ ] **Check 4 — Placeholder Leakage Filter:** Does a regex filter (`\[[A-Z0-9_]+\]|\{\{.*?\}\}`) verify that no unreplaced template brackets (such as `Hi [FIRST_NAME]`) ever reach a customer?
- [ ] **Check 5 — Active Customer / Open Dispute Suppression:** For sales and follow-up sequences, does the workflow check CRM status to confirm the contact does not have an open support escalation or unpaid 60-day dispute?
- [ ] **Check 6 — Quiet Hours & Time-Zone Enforcement:** For non-inbound follow-up SMS messages, does the router verify that the recipient's local time is between **8:00 AM and 8:00 PM**?
- [ ] **Check 7 — Confidence Score Floor (`≥ 0.90`):** Does any response with `confidence_score < 0.90` automatically downgrade from Green Zone to Amber Zone for human inspection?
- [ ] **Check 8 — Immutable Audit Log Write:** Does the final step write `event_id`, `timestamp_utc`, `input_summary`, `ai_json_output`, `risk_zone`, `approved_by`, and `execution_status` to your central Audit Log table?

Part D: Fallback Queue, Dead-Letter Alert & Emergency Kill-Switch Protocol Log

Every resilient small business automation system includes a clear **Emergency Kill-Switch** so any front-desk coordinator or manager can pause an automation in under 10 seconds if a third-party software outage occurs.

D.1 Active Workflow Kill-Switch & Fallback Directory

Fill in the operational directory below and pin a printed copy at the front desk and inside your Notion SOP Vault:

Workflow ID & Name	Automation Bridge Scenario URL / ID	Single-Record Pause Toggle (CRM Field)	Global Kill-Switch Location	Static Fallback Message Sent During Outage	Accountable Owner & Backup Contact
`WF-01` : 60s Lead Concierge	`[SCENARIO_URL_01]`	Set Contact `bot_pause = TRUE`	Toggle Scenario `OFF` in Make/Zapier	*"Thanks for reaching out to `[BUSINESS_NAME]`! We received your inquiry and our team will text/call you shortly."*	`[OWNER_01]` / `[BACKUP_01]`
`WF-02` : 3-Tier Quote Builder	`[SCENARIO_URL_02]`	Set Deal `auto_quote = FALSE`	Toggle Scenario `OFF` in Make/Zapier	Hold in Draft Queue; notify estimator in `#quotes-amber-gate`.	`[OWNER_02]` / `[BACKUP_02]`
`WF-03` : 14-Day Quote Nurture	`[SCENARIO_URL_03]`	Set Deal `nurture_status = PAUSED`	Toggle Scenario `OFF` in Make/Zapier	Pause scheduled touches; log status in CRM deal timeline.	`[OWNER_03]` / `[BACKUP_03]`
`WF-04` : Tier-1 Support Shield	`[SCENARIO_URL_04]`	Tag Ticket `human_takeover`	Toggle Scenario `OFF` in Make/Zapier	*"We have logged your support request (Ticket `#[ID]`) and a specialist is reviewing it now."*	`[OWNER_04]` / `[BACKUP_04]`
`WF-05` : Overdue AR Chaser	`[SCENARIO_URL_05]`	Set Invoice `pause_reminders = TRUE`	Toggle Scenario `OFF` in Make/Zapier	Hold automated reminder; flag invoice on Friday AR Exception Report.	`[OWNER_05]` / `[BACKUP_05]`

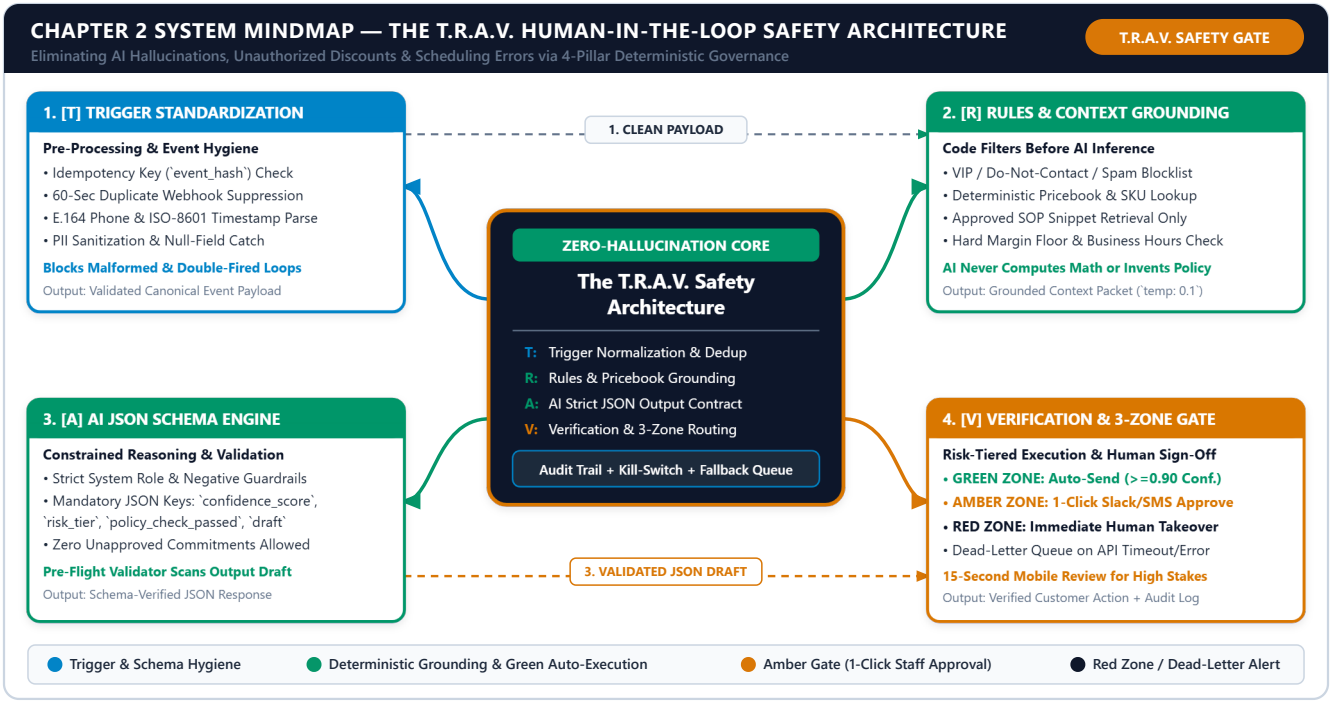

Part E: Chapter 2 Safety Readiness Sign-Off

Governance Verification Metric	Target Studio Standard	Your Current Status	Verified Date
1. % of Live Workflows Mapped to Green/Amber/Red Zones	`100%`	`[YOUR_ZONE_PCT]%`	`[DATE_01]`
2. LLM API Temperature Across All Operational Prompts	`0.0 to 0.2 Max`	`[YOUR_TEMP_SETTING]`	`[DATE_02]`

Governance Verification Metric	Target Studio Standard	Your Current Status	Verified Date
3. Pre-Flight Placeholder & Price-Bound Regex Active	`Active on 100% of Customer Outputs`	`[YOUR_REGEX_STATUS]`	`[DATE_03]`
4. Dead-Letter Queue & Staff Alert Channel Tested	`Simulated Failure Verified`	`[YOUR_DLQ_STATUS]`	`[DATE_04]`

Safety Architecture Approved By: `[OWNER_OR_COMPLIANCE_LEAD]`
Business Name: `[BUSINESS_NAME]`

Worksheet 3: Multi-Channel Lead Capture & Qualification Blueprint

Companion To: Chapter 3 — *The 60-Second Speed-to-Lead & Multi-Channel Intake System*
Document Code: `WB-CH03-INSTANT-V1`
Target Completion Time: 35 Minutes
Applicable Team Size: Solo Operator to 25-Person Small Business

---

Executive Instructions: Building Your 60-Second Frontline Funnel

Responding to an inbound prospect within **60 seconds** yields a **391% higher conversion rate** than responding at the 5-minute mark, and more than **21x higher qualification rates** than waiting 30 minutes. Yet in most small businesses, leads arrive across six disconnected doors—missed phone calls, website forms, emails, Instagram/Facebook DMs, WhatsApp messages, and Google Business Profile chats—and sit unnoticed for hours.

Use this blueprint to wire all inbound lead channels into **The I.N.S.T.A.N.T. Lead Router** (`Dept 01`) so that 100% of genuine prospects receive a personalized, compliant response and booking path in under 60 seconds, 24 hours a day, 365 days a year.

Part A: Omni-Channel Intake Inventory & Webhook Mapping

Audit every entry door where a prospective customer, patient, or B2B client can contact your business today, and map each channel to your central automation bridge (Make, Zapier, or n8n):

Channel ID	Inbound Lead Channel	Current Software / Platform	Monthly Inquiry Volume	Webhook / Trigger Event Type	Target Response Channel(s)	Target SLA (Seconds)	Connected to Router? (`Yes` / `No`)
`CH-01`	**Inbound Phone — Missed / Busy / After-Hours**	`[VOIP_PROVIDER]` *(e.g., OpenPhone, RingCentral, Twilio)*	`[VOL_01]`	`call.missed` / `voicemail.created` (after 20s ring)	Instant SMS (`Prompt 3.3`) + CRM Deal	`< 35 sec`	`[STATUS_01]`
`CH-02`	**Website Contact / Estimate Request Form**	`[WEB_FORM_APP]` *(e.g., WPForms, Typeform, HubSpot, Webflow)*	`[VOL_02]`	`form.submission.webhook`	Instant SMS + Personalized Email (`Prompt 3.2`)	`< 45 sec`	`[STATUS_02]`

Channel ID	Inbound Lead Channel	Current Software / Platform	Monthly Inquiry Volume	Webhook / Trigger Event Type	Target Response Channel(s)	Target SLA (Seconds)	Connected to Router? (`Yes` / `No`)
`CH-03`	**Google Local Service Ads / Google Business Chat**	`[GOOGLE_GBP_ACCOUNT]`	`[VOL_03]`	`gbp.message.received` / `lsa.lead.created`	GBP Reply + SMS Follow-Up	`< 45 sec`	`[STATUS_03]`
`CH-04`	**Meta Lead Ads & Instagram / Facebook DMs**	`[META_BUSINESS_SUITE]`	`[VOL_04]`	`leadgen.webhook` / `instagram.dm.received`	Instant DM Reply + SMS/Email	`< 45 sec`	`[STATUS_04]`
`CH-05`	**Direct SMS / WhatsApp Business Inbound**	`[SMS_WHATSAPP_NUMBER]`	`[VOL_05]`	`message.incoming.webhook`	Conversational SMS/WhatsApp (`Prompt 3.3`)	`< 30 sec`	`[STATUS_05]`
`CH-06`	**Direct Email Inquiries (`info@` / `sales@` / Portals)**	`[EMAIL_PROVIDER]` *(e.g., Google Workspace, M365)*	`[VOL_06]`	`email.arrived` (Filtered by Subject/Parser)	Threaded Email Reply + SMS Alert	`< 60 sec`	`[STATUS_06]`
TOTAL	**All Inbound Doors Combined**	**Unified into 1 Webhook Bus**	`[SUM_VOL]`	**Normalized JSON Event**	**Multi-Channel 60s First Touch**	`< 60 sec`	**Goal: 100%**

Part B: Standard CRM Field Mapping & Normalization Contract

To prevent duplicate contacts and broken downstream automations in `Dept 02` (Quoting) and `Dept 04` (Invoicing), every inbound channel in **Part A** must map its raw fields into the **12 Canonical Lead Fields** below before saving to your CRM:

#	Canonical CRM Field Key	Data Type	Normalization & Formatting Rule (`[N]` Step)	Fallback Value if Missing from Raw Inquiry	Your CRM Custom Property Name
`01`	`contact_first_name`	`String`	Title-case first token; strip emojis and titles (`Dr.` , `Mr.`)	`"there"` *(so greeting reads `"Hi there,"`)*	`[CRM_FIELD_01]`

#	Canonical CRM Field Key	Data Type	Normalization & Formatting Rule (`[N]` Step)	Fallback Value if Missing from Raw Inquiry	Your CRM Custom Property Name
02	`contact_last_name`	`String`	Title-case remaining name tokens	`""` (Blank until slot-filled via `Prompt 3.4`)	`[CRM_FIELD_02]`
03	`phone_e164`	`String`	Strip spaces/dashes/parens; prefix country code (e.g., `+15125550199`, `+447700900077`)	`null` (Route to Email-Only First Touch)	`[CRM_FIELD_03]`
04	`email_clean`	`String`	Lowercase, trim whitespace, validate `@` domain syntax	`null` (Route to SMS-Only First Touch)	`[CRM_FIELD_04]`
05	`postal_or_zip_code`	`String`	Extract 5-digit US Zip or UK/CA/AU postcode via regex	`"UNKNOWN_GEO"` (Trigger `Prompt 3.4` ask)	`[CRM_FIELD_05]`
06	`source_channel`	`Enum`	`MISSED_CALL`, `WEB_FORM`, `GOOGLE_GBP`, `META_DM`, `SMS_DIRECT`, `EMAIL_PORTAL`	`"DIRECT_UNKNOWN"`	`[CRM_FIELD_06]`
07	`utm_campaign_source`	`String`	Capture `utm_source` + `utm_campaign` or referring URL	`"organic_or_direct"`	`[CRM_FIELD_07]`
08	`service_category`	`Enum`	Classify via `Prompt 3.1` into your official service/product lines	`"GENERAL_INQUIRY"`	`[CRM_FIELD_08]`
09	`urgency_tier`	`Enum`	`EMERGENCY_SAME_DAY`, `HIGH_THIS_WEEK`, `STANDARD_PLANNING`, `LOW_EXPLORATORY`	`"STANDARD_PLANNING"`	`[CRM_FIELD_09]`
10	`lead_intent_score`	`Integer`	Calculated `0–100` score from `Prompt 3.1`	`50`	`[CRM_FIELD_10]`
11	`sms_opt_in_status`	`Boolean`	`true` if web checkbox checked OR inbound call/SMS initiated by prospect	`false` (Do not send promotional SMS)	`[CRM_FIELD_11]`
12	`response_sla_seconds`	`Integer`	`UNIX_TIMESTAMP(first_reply_sent_at) - UNIX_TIMESTAMP(lead_created_at)`	`null` (Alert on Friday Scorecard if `>60`)	`[CRM_FIELD_12]`

Deduplication Lookup Order (`3-Second Upsert Rule`)

1. **Primary Lookup:** Search CRM Contacts by exact `phone_e164`.
2. **Secondary Lookup (if phone is null or not found):** Search CRM Contacts by exact `email_clean`.

3. **Upsert Action:** If a matching contact is found, **update** the existing contact record, append the new inquiry note to their activity timeline, and create/update their active Deal in `Dept 01`. Never create a duplicate contact row.

Part C: The 5-Question Qualification, Scoring & Disqualification Matrix

Define the exact business rules that **Prompt 3.1** and **Prompt 3.3** will use to score your inbound leads (`0–100 points`), ask 1–2 frictionless qualifying questions, and filter out spam or out-of-scope inquiries:

C.1 Your Custom Qualification Criteria Table

Qualification Dimension	Ideal High-Intent Fit (`+20 to +30 Pts`)	Standard Acceptable Fit (`+10 to +15 Pts`)	Disqualified / Out-of-Scope (`Route to Referral / Redirect`)	Your Exact Business Rule / Values
1. Geographic Territory / Delivery Zone	Inside primary zip/postal codes or target B2B countries	Secondary zone (travel fee or minimum order applies)	Outside service area or restricted shipping country	**Approved Zips/Regions:** `[YOUR_APPROVED_GEO_ZONES]`
2. Service / Product Category Requested	Core high-margin service, treatment plan, or retainer	Standard repair, consult, or catalog order	Services you do not perform (e.g., warranty on competitor gear)	**Core Services:** `[YOUR_CORE_SERVICES_LIST]`
3. Timeline & Urgency	Immediate / Emergency / Within 7 days	Within 14 to 30 days	"Just browsing for next year" / Student research	**Emergency Keywords:** `[YOUR_URGENT_KEYWORDS]`
4. Estimated Budget / Deal Size Minimum	Exceeds target anchor package (`>$[VIP_THRESHOLD]`)	Meets minimum job/order floor (`>$[MIN_ORDER_FLOOR]`)	Below minimum dispatch/project floor (`<$[MIN_ORDER_FLOOR]`)	**Min Floor:** `$[MIN_ORDER_FLOOR]` \| **VIP:** `$[VIP_THRESHOLD]`
5. Decision-Maker Authority	Homeowner, Practice Owner, Company Founder, Authorized Buyer	Vetted Operations Manager or Spouse	Cold SEO/marketing vendor, job applicant, robocaller	**Spam Filter Keywords:** `SEO, backlinks, virtual assistant, merchant cash advance`

C.2 Your 2 Frictionless SMS Qualifying Questions

When a prospect calls and misses you—or submits a short inquiry—never send a link to a 15-question survey. Write the **two simple questions** your 60-second SMS concierge (`Prompt 3.2` / `Prompt 3.3`) will ask so the prospect can reply in 10 seconds with a thumb tap:

- **Qualifying Question 1 (Service Category / Core Need):**
  "Hi `{{contact_first_name}}`, this is the automated desk at `[BUSINESS_NAME]`. Sorry we missed your call! So we can get you taken care of right away, are you looking for: ***(1)*** *`[OPTION_1_CORE_SERVICE]`,* ***(2)*** *`[OPTION_2_SERVICE]`, or* ***(3)*** *`[OPTION_3_EMERGENCY_OR_CUSTOM]`?"*
- **Qualifying Question 2 (Location / Urgency + Booking Link):**
  "Got it! What is your ***zip/postal code*** *(or project timeline), and would you like to grab our next open slot right here?* `[DIRECT_CALENDAR_BOOKING_LINK]` *"*

Part D: Telecommunications & Privacy Compliance Checklist (A2P 10DLC / TCPA / GDPR / CASL)

Before turning on automated SMS or WhatsApp replies in `Dept 01`, complete and verify these six mandatory compliance safeguards:

- [ ] **1. Carrier Brand & Campaign Registration (US/CA A2P 10DLC / UK & AU Sender ID):** Our business EIN/registration number and conversational customer-care use case are registered and approved inside our VoIP/SMS provider (Twilio, OpenPhone, HighLevel, or RingCentral).
- [ ] **2. Website Form Explicit SMS Opt-In Disclosure:** Every website quote/contact form includes an explicit consent checkbox beneath the phone field reading:
  `[ ] By providing your phone number, you agree to receive automated and human text messages from [BUSINESS_NAME] regarding your inquiry, scheduling, and service updates. Msg & data rates may apply. Reply STOP to opt out.`
- [ ] **3. Clear Sender Identification in First Message:** Every automated first-touch SMS clearly states our business name (`[BUSINESS_NAME]`) in the first sentence.
- [ ] **4. Automated `STOP` / `UNSUBSCRIBE` Webhook Listener:** If any recipient replies `STOP`, `UNSUBSCRIBE`, `CANCEL`, or `QUIT`, our VoIP carrier and CRM immediately set `sms_opt_in_status = false` and block all future automated texts.
- [ ] **5. Spam / Robocall Pre-Filter Active (`Prompt 3.1`):** Automated SMS replies are suppressed whenever the inbound message is flagged as a vendor solicitation, automated bot, or `noreply@` address.
- [ ] **6. Direct Human Escalation Keyword (`HUMAN` / `AGENT` / `0`):** If a prospect replies `HUMAN`, `CALL ME`, or expresses frustration, the bot immediately halts conversational slot-filling and triggers a live staff callback alert (`Prompt 3.5`).

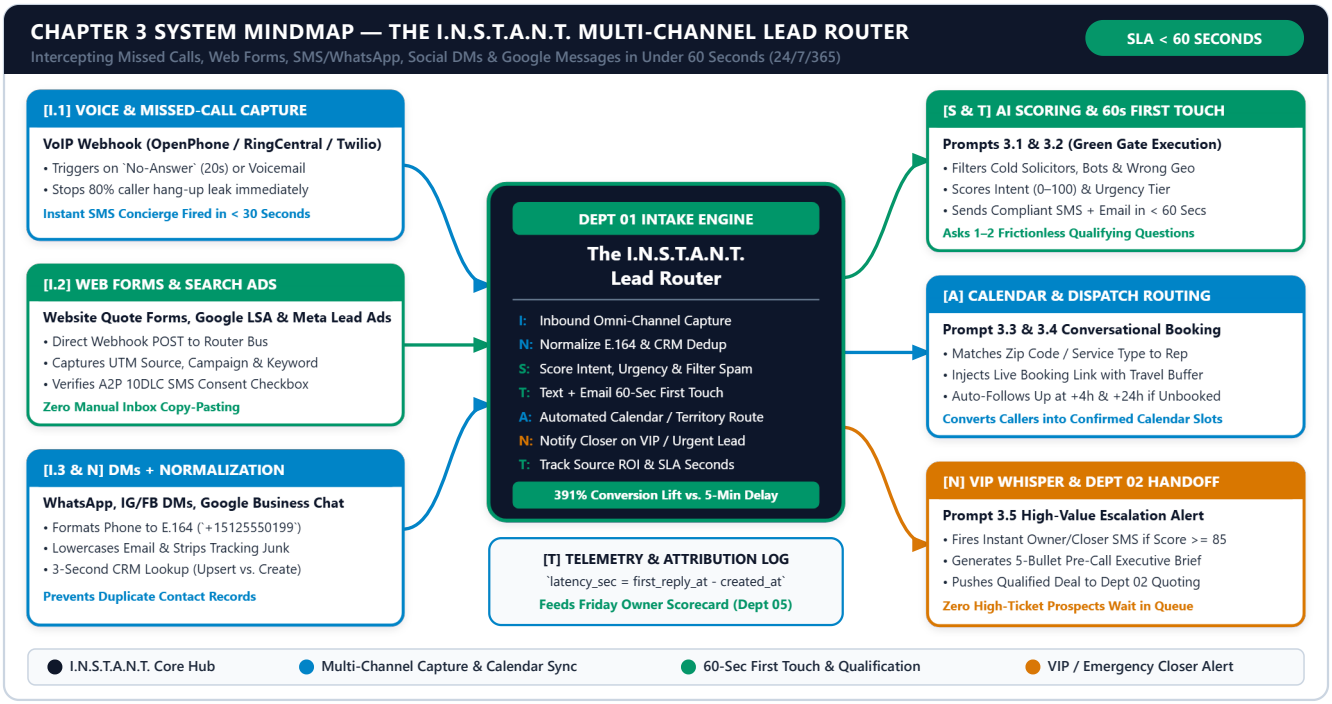

Part E: 60-Second Speed-to-Lead Live Verification & SLA Test Log

Before marking Chapter 3 complete, run **five live end-to-end tests** from a personal mobile phone and external email account (including at least one test after 6:00 PM) and log the exact stopwatch timestamps below:

Test #	Simulated Inbound Scenario	Test Timestamp (`lead_created_at`)	First Reply Received (`first_reply_at`)	Measured Latency (Seconds)	CRM Contact Upserted & Scored?	Booking Link / VIP Alert Verified?	Pass / Fail (`< 60s SLA`)
Test 1	Call business number from mobile & hang up at voicemail	`[T1_START]`	`[T1_END]`	`[T1_SEC] sec`	`[YES / NO]`	`[YES / NO]`	`[PASS / FAIL]`
Test 2	Submit website quote form with high-ticket VIP scope	`[T2_START]`	`[T2_END]`	`[T2_SEC] sec`	`[YES / NO]`	`[YES / NO]`	`[PASS / FAIL]`
Test 3	Send incomplete inquiry missing zip code / service type	`[T3_START]`	`[T3_END]`	`[T3_SEC] sec`	`[YES / NO]`	`[YES / NO]`	`[PASS / FAIL]`
Test 4	Submit simulated cold SEO spam solicitation form	`[T4_START]`	`Suppressed`	`0 SMS Sent`	`Tagged Spam`	`Suppressed`	`[PASS / FAIL]`
Test 5	After-hours / weekend inquiry via Social DM or Web Form	`[T5_START]`	`[T5_END]`	`[T5_SEC] sec`	`[YES / NO]`	`[YES / NO]`	`[PASS / FAIL]`

Speed-to-Lead Architecture Verified By: `[OWNER_OR_REVOPS_LEAD]`
Business Name: `[BUSINESS_NAME]`
Median Verified Response SLA: `[MEDIAN_SLA_SECONDS] seconds` *(Target: `< 45 seconds`)*
Sign-Off Date: `[SIGN_OFF_DATE]`

Worksheet 4: Automated Quote Matrix & Follow-Up Cadence Planner

Companion To: Chapter 4 — *Automated Estimating, Quotes & Follow-Up Sequences That Close*
Document Code: `WB-CH04-QUOTES-V1`
Target Completion Time: 40 Minutes
Applicable Team Size: Solo Operator to 25-Person Small Business

---

Executive Instructions: Eliminating "Gut-Feel" Quoting & Silent Proposal Decay

Small businesses lose up to 40% of their qualified sales pipeline inside **Department 02 (Quoting & Follow-Up)** due to three structural flaws: 1. **The Owner-Only Pricing Bottleneck:** Because pricing rules live inside the owner's head ("gut-feel quoting"), estimates wait 24 to 72 hours until the owner has a quiet evening to type them up. 2. **Single-Option "Take-It-or-Leave-It" Quotes:** Sending a single price forces the buyer to compare your single number against a cheaper competitor, rather than choosing *which level of value* they want from you. 3. **Abandoning Follow-Up After One Email:** Over 80% of B2B and local service deals close between Touch #5 and Touch #8, yet 44% of small businesses stop following up after sending a single PDF.

Use this workbook to convert your pricing into a **Deterministic 3-Tier Price Matrix** (`Part A` & `Part B`), enforce your **Amber-Gate Gross Margin Floor** (`Part C`), and map your **14-Day 6-Touch Follow-Up Loop** (`Part D` & `Part E`).

Part A: Good-Better-Best (3-Tier) Package & Gross Margin Matrix

Whenever a prospect requests a quote, your AI Estimating Engine (`Prompt 4.1` & `Prompt 4.2`) should present **three structured options** on a single page: * **Option 1 — Essential / Core Compliance (`1.00x Baseline`):** Solves the immediate mandatory problem with standard turnaround and zero non-essential add-ons. Protects your price floor for budget-sensitive buyers. * **Option 2 — Complete Recommended Solution (`1.30x–1.45x Anchor`):** Includes the core scope plus extended warranty, preventative maintenance, or optimization reporting. Engineered as the highest-value anchor (**selected by 55% to 65% of buyers**). * **Option 3 — Priority Turnkey / VIP Package (`1.65x–1.90x Premium`):** Includes everything in Option 2 plus expedited scheduling, dedicated senior technician/partner oversight, and multi-quarter protection. Makes Option 2 look moderately priced while capturing 15% to 20% of buyers who value speed and certainty above all else.

A.1 Your Core Service Lines — 3-Tier Pricing & Margin Table

Complete the matrix below for your top three revenue-generating services or product categories:

Service Line & Option Tier	Included Scope & Deliverables (`3–4 Bullet Points`)	Direct Labor Hours (`H`)	Burdened Labor Cost (`$`)	Direct Materials / COGS (`$`)	Total Direct Cost (`C`)	Target Price (`P`)	Gross Margin `$` (`P − C`)	Gross Margin `%` (`(P−C)÷P`)
Service Line 1: `[SERVICE_LINE_1_NAME]`	**Base Unit Metric:** `[BASE_UNIT_1]` *(e.g., per SqFt, per Ton, per Monthly Retainer)*	—	—	—	—	—	—	**Floor:** `≥48%`
• **Tier 1: Essential**	`[S1_TIER1_DELIVERABLES]`	`[S1_T1_HRS]`	`$[S1_T1_LAB]`	`$[S1_T1_MAT]`	`$[S1_T1_COST]`	**`$[S1_T1_PRICE]`**	`$[S1_T1_GM]`	`[S1_T1_PCT]%`
• **Tier 2: Complete (Anchor)**	`[S1_TIER2_DELIVERABLES]`	`[S1_T2_HRS]`	`$[S1_T2_LAB]`	`$[S1_T2_MAT]`	`$[S1_T2_COST]`	**`$[S1_T2_PRICE]`**	`$[S1_T2_GM]`	`[S1_T2_PCT]%`
• **Tier 3: Priority VIP**	`[S1_TIER3_DELIVERABLES]`	`[S1_T3_HRS]`	`$[S1_T3_LAB]`	`$[S1_T3_MAT]`	`$[S1_T3_COST]`	**`$[S1_T3_PRICE]`**	`$[S1_T3_GM]`	`[S1_T3_PCT]%`
Service Line 2: `[SERVICE_LINE_2_NAME]`	**Base Unit Metric:** `[BASE_UNIT_2]`	—	—	—	—	—	—	**Floor:** `≥48%`
• **Tier 1: Essential**	`[S2_TIER1_DELIVERABLES]`	`[S2_T1_HRS]`	`$[S2_T1_LAB]`	`$[S2_T1_MAT]`	`$[S2_T1_COST]`	**`$[S2_T1_PRICE]`**	`$[S2_T1_GM]`	`[S2_T1_PCT]%`
• **Tier 2: Complete (Anchor)**	`[S2_TIER2_DELIVERABLES]`	`[S2_T2_HRS]`	`$[S2_T2_LAB]`	`$[S2_T2_MAT]`	`$[S2_T2_COST]`	**`$[S2_T2_PRICE]`**	`$[S2_T2_GM]`	`[S2_T2_PCT]%`
• **Tier 3: Priority VIP**	`[S2_TIER3_DELIVERABLES]`	`[S2_T3_HRS]`	`$[S2_T3_LAB]`	`$[S2_T3_MAT]`	`$[S2_T3_COST]`	**`$[S2_T3_PRICE]`**	`$[S2_T3_GM]`	`[S2_T3_PCT]%`
Service Line 3: `[SERVICE_LINE_3_NAME]`	**Base Unit Metric:** `[BASE_UNIT_3]`	—	—	—	—	—	—	**Floor:** `≥48%`
• **Tier 1: Essential**	`[S3_TIER1_DELIVERABLES]`	`[S3_T1_HRS]`	`$[S3_T1_LAB]`	`$[S3_T1_MAT]`	`$[S3_T1_COST]`	**`$[S3_T1_PRICE]`**	`$[S3_T1_GM]`	`[S3_T1_PCT]%`

Service Line & Option Tier	Included Scope & Deliverables (`3–4 Bullet Points`)	Direct Labor Hours (`H`)	Burdened Labor Cost (`$`)	Direct Materials / COGS (`$`)	Total Direct Cost (`C`)	Target Price (`P`)	Gross Margin `$` (`P − C`)	Gross Margin `%` (`(P−C)÷P`)
• **Tier 2: Complete (Anchor)**	`[S3_TIER2_DELIVERABLES]`	`[S3_T2_HRS]`	`$[S3_T2_LAB]`	`$[S3_T2_MAT]`	`$[S3_T2_COST]`	`$[S3_T2_PRICE]`	`$[S3_T2_GM]`	`[S3_T2_PCT]%`
• **Tier 3: Priority VIP**	`[S3_TIER3_DELIVERABLES]`	`[S3_T3_HRS]`	`$[S3_T3_LAB]`	`$[S3_T3_MAT]`	`$[S3_T3_COST]`	`$[S3_T3_PRICE]`	`$[S3_T3_GM]`	`[S3_T3_PCT]%`

Part B: Deterministic Complexity Multipliers & Add-On SKU Registry

How do you get "owner intuition" out of your head and into a table that `Prompt 4.1` can apply with 100% mathematical accuracy? You define **Complexity Multipliers** (for difficult access, legacy data migration, rush timelines, or multi-location coordination) and **Fixed Add-On SKUs**.

B.1 Complexity Multiplier Rules

> `Calculated Option Price = (Base Tier Price × Complexity Multiplier) + \sum Selected Add-On SKUs`

Multiplier Code	Operational Condition / Trigger in Discovery Notes	Multiplier Factor	Automatic Labor Buffer Added	Your Specific Condition Definition
`MULT-STD`	**Standard Access / Clean Baseline:** Normal business hours, standard layout/data, 1 decision-maker	`1.00x`	`+0% hrs`	`[YOUR_STD_CONDITION]`
`MULT-MOD`	**Moderate Complexity:** Tight attic/crawlspace, 2–3 software integrations, older building/code, 2 locations	`1.20x`	`+20% hrs`	`[YOUR_MOD_CONDITION]`
`MULT-HIGH`	**High Complexity / Heavy Remediation:** Historic/commercial code, messy legacy database cleanup, custom fabrication	`1.45x`	`+45% hrs`	`[YOUR_HIGH_CONDITION]`
`MULT-RUSH`	**Expedited / Weekend / 48-Hour Rush Turnaround:** Customer requests immediate priority jump ahead of queue	`1.30x`	Overtime rate	`[YOUR_RUSH_CONDITION]`

B.2 Approved Add-On SKU Table (Grounded Reference for `Prompt 4.1`)

Add-On SKU ID	Add-On Name & Customer-Facing Description	Unit Basis	Direct Cost ($)	Retail Price ($)	Auto-Included in Which Tier?
`ADD-01`	`[ADDON_01_NAME]` *(e.g., 2-Year Preventative Maintenance / Monthly Analytics Pack)*	`[UNIT_01]`	`$[COST_01]`	`$[PRICE_01]`	`Tier 2 & Tier 3`
`ADD-02`	`[ADDON_02_NAME]` *(e.g., Priority 4-Hour SLA / Dedicated Account Slack Channel)*	`[UNIT_02]`	`$[COST_02]`	`$[PRICE_02]`	`Tier 3 Only`
`ADD-03`	`[ADDON_03_NAME]` *(e.g., Extended 5-Year Parts & Labor Protection / Annual Audit)*	`[UNIT_03]`	`$[COST_03]`	`$[PRICE_03]`	`Tier 3 Only`
`ADD-04`	`[ADDON_04_NAME]` *(e.g., Old Equipment Haul-Away / Legacy Data Archive Migration)*	`[UNIT_04]`	`$[COST_04]`	`$[PRICE_04]`	`Optional Line Item`
`ADD-05`	`[ADDON_05_NAME]` *(e.g., Staff On-Site Training Session / Custom Brand Kit)*	`[UNIT_05]`	`$[COST_05]`	`$[PRICE_05]`	`Tier 2 & Tier 3`

Part C: Amber-Gate Margin Floor & Discount Guardrail Rules

Lock in the hard financial boundaries that your pre-flight validator (`Prompt 2.4` / `Prompt 4.1`) and your **Amber Approval Card** enforce before any proposal reaches a prospect:

1. **Minimum Acceptable Gross Margin Floor (`GM_FLOOR`):** `[MIN_GROSS_MARGIN_PCT]%` *(Studio Recommended Floor: `48.0%` for services/clinics/agencies; `38.0%` for retail/equipment installation).* Any quote draft that calculates below this margin is automatically blocked and flagged in red on the owner's Slack card.
2. **Maximum Pre-Approved Paid-in-Full Incentive (`MAX_PIF_INCENTIVE`):** `[MAX_PIF_PCT]%` *(e.g., `3% to 5%` maximum savings only when the customer pays 100% upfront via ACH/bank transfer instead of credit card stages).*
3. **The Iron Rule of Price Objections (`Prompt 4.4`):** Staff and AI prompts are **strictly forbidden** from reducing the price of `Tier 2` or `Tier 3` while keeping the scope identical. If a prospect states that `Tier 2` exceeds their budget, the system must either: * Pivot the buyer to **`Tier 1 (Essential Scope)`**, OR * Split `Tier 2` into **Phase 1 (Immediate Core)** and **Phase 2 (60 Days Later)**.
4. **Proposal Expiration Window:** Every generated quote includes a deterministic validity date set to **`[VALIDITY_DAYS]` calendar days** from dispatch *(Recommended: `14 days` to align with the 14-day nurture loop).*

Part D: The 14-Day 6-Touch Multi-Channel Follow-Up Cadence Grid

Once you tap `[Approve & Send]` on an Amber Quote Card, the prospect enters your automated **14-Day Multi-Touch Nurture Loop (`Prompt 4.3`)**. Unlike nagging *"Just checking in on my quote"* emails, every touch delivers a distinct piece of decision-making value:

Touch # & Day	Timing Offset	Channel	Core Strategic Angle & Value Delivered	Subject Line / SMS Preview Template	Automated Stop Condition Checked Before Firing
Touch 1 (Day 1)	`Immediate (0m)`	**Email + SMS**	**Interactive 3-Option Proposal Delivery + Heads-Up:** Delivers the 3-tier quote link/PDF and sends a 1-sentence SMS confirming arrival.	*Email:* `Your 3 Options for [PROJECT_OR_SERVICE] – [BUSINESS_NAME]` | *SMS:* `Hi {{first_name}}, just emailed your 3 custom options ...`	Verify `amber_approved == true`
Touch 2 (Day 2)	`+28 Hours`	**Email**	**Top 3 Process & Implementation FAQs:** Proactively answers the 3 questions prospects hesitate to ask (timeline, disruption, warranty/guarantee).	`Quick question on your [SERVICE_CATEGORY] plan (+ how we prevent delays)`	Stop if `Quote_Status == Signed` OR `Prospect_Replied == true`
Touch 3 (Day 4)	`+96 Hours`	**SMS + Email**	**Matched Case Study / Before-After Social Proof:** Shares a 4-sentence story of a similar customer who chose `Tier 2` and the measurable result they achieved.	`How [SIMILAR_CLIENT_TYPE] solved [PAIN_POINT] in [TIMEFRAME]`	Stop if `Quote_Status == Signed` OR `Prospect_Replied == true`
Touch 4 (Day 7)	`+7 Days`	**SMS**	**Frictionless Timeline & Question Check:** Short conversational text asking if they are still targeting their stated start date.	`Hi {{first_name}}, are you still aiming to have [OUTCOME] wrapped up by [TARGET_DATE]?`	Stop if `Quote_Status == Signed` OR `Prospect_Replied == true`
Touch 5 (Day 10)	`+10 Days`	**Email**	**Scope Adjustment / Tier-1 Pivot Offer (`Prompt 4.4`):** Reminds them that if budget or timing shifted, we can start with `Option 1 (Essential)` first.	`Want to adjust the scope or start with Option 1 for [BUSINESS_OR_HOME]?`	Stop if `Quote_Status == Signed` OR `Prospect_Replied == true`

Touch # & Day	Timing Offset	Channel	Core Strategic Angle & Value Delivered	Subject Line / SMS Preview Template	Automated Stop Condition Checked Before Firing
Touch 6 (Day 14)	`+14 Days`	**Email + SMS**	**Polite "Close-the-File" Trigger (`Prompt 4.5`):** Politely informs them their quote reservation expires today and asks if we should close their file or hold their slot.	`Should I close out your [SERVICE_CATEGORY] file for now, {{first_name}}?`	Stop if `Quote_Status == Signed` ; if no reply by Day 21, move to `90-Day Win-Back`

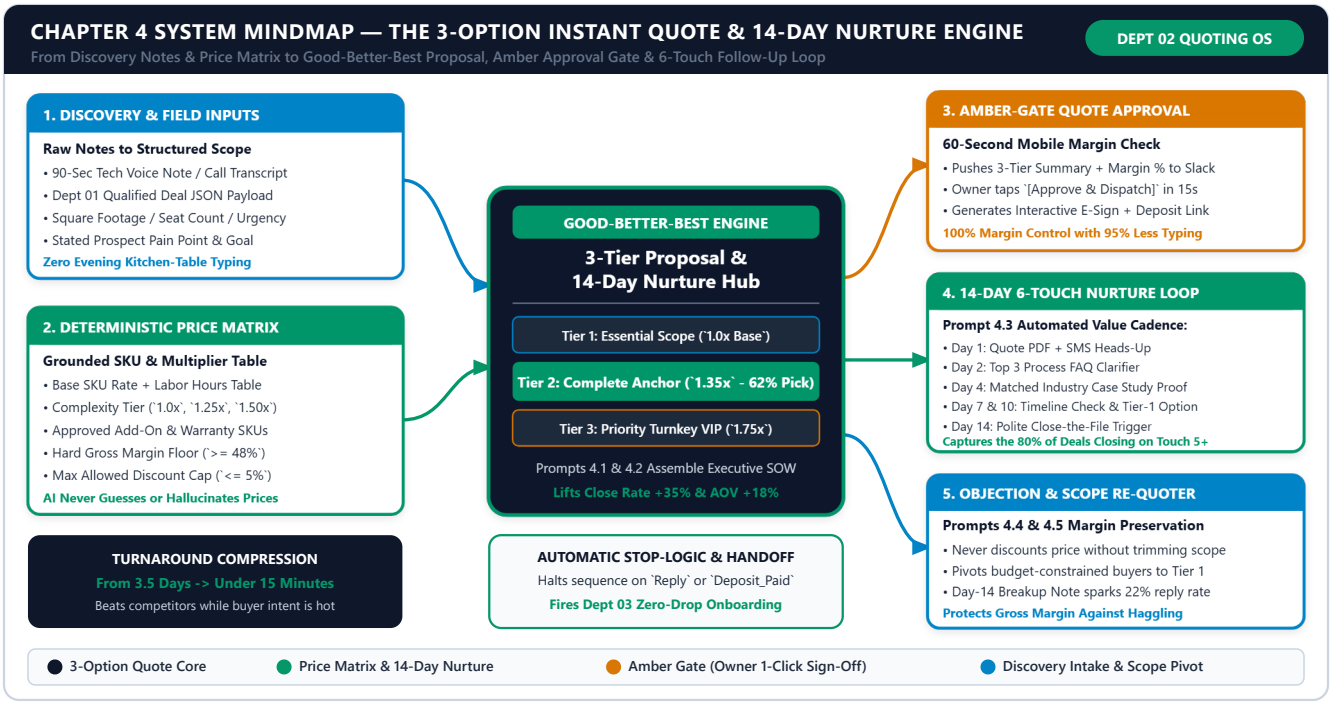

Part E: Stop-on-Reply & Stop-on-Deposit Webhook Verification Checklist

Before activating your 14-day quote follow-up sequence, verify that your automation bridge enforces these five **Kill-Switch Triggers** so a paying or actively replying client never receives an automated chaser:

- [ ] **1. E-Signature Webhook Listener (`PandaDoc` / `Qwilr` / `ServiceTitan` / `HubSpot Quotes`):** The instant `document.completed` or `quote.accepted` fires, the bridge updates CRM Deal Stage to `CLOSED_WON` , cancels all pending Day 2–14 scheduled touches, and triggers `Dept 03` Onboarding.
- [ ] **2. Deposit Payment Webhook Listener (`Stripe` / `QuickBooks` / `Square`):** If a customer pays a deposit invoice directly via bank link before signing the form, the payment webhook immediately halts the quote follow-up loop.
- [ ] **3. Inbound Email Reply Detection:** Before sending Touch 2, 3, 5, or 6, the workflow queries the email thread (`thread_id`) to confirm zero unread or newer inbound replies from `{{email_clean}}` .
- [ ] **4. Inbound SMS Reply Detection:** If the prospect replies via SMS to Touch 1, 3, or 4 (e.g., "*Can we talk Thursday?*" or "*How much without the warranty?*"), the sequence pauses automatically and routes the reply to `Prompt 4.4` (Amber Gate).
- [ ] **5. Live Pre-Send CRM Stage Re-Check:** Never rely solely on a 14-day sleep timer. Before every single touch executes, perform a live `GET /deals/{{deal_id}}` API read and verify `deal_stage == "QUOTE_SENT_OPEN"` .

Worksheet 5: Customer Onboarding & Handoff Verification Checklist

Companion to: Chapter 5 — *Frictionless Customer Onboarding, Scheduling & Order Handoffs*
Framework Reference: *The Zero-Drop Handoff Protocol (Stage 1 Payment Trigger -> Stage 2 Welcome Sequence -> Stage 3 Intake Verification & Chaser Loop -> Stage 4 AI Delivery Brief & Task Provisioning)*
Department Engine: `Dept 03 — Customer Onboarding & Fulfillment Handoff`
Estimated Completion Time: 45 Minutes
Interactive Companion: Pre-configured inside the Notion Small Business OS (`06-NOTION-TEMPLATES/`) and the Pro Web App Suite (`07-INTERACTIVE-TOOLS/index.html` — Access Code: `SMALLBIZ-OS-PRO-2026`).

Instructions for the Owner & Operations Lead

The most expensive operational breakdown in a small business occurs during the **post-deposit handoff gap**—the critical window between the moment a customer signs an agreement or pays an invoice (`Dept 02`) and the moment your fulfillment crew, clinical provider, or project team begins executing the work (`Dept 03`). When sales notes remain trapped inside scattered phone transcripts, email threads, or a salesperson's memory, your delivery team starts blind, customers experience post-purchase silence, and field technicians or designers waste billable hours on preventable rework.

Use this 5-part operational workbook to standardize your **Sales-to-Fulfillment Data Contract**, configure your **Instant Welcome Packet**, automate your **Day 1 / Day 3 / Day 5 Missing-Asset Chaser Loop**, deploy the **AI-Compiled Internal Staff Delivery Brief**, and track your **First-7-Day Onboarding Service-Level Agreement (SLA)**.

Part 1: Sales-to-Fulfillment Required Data Contract Table

Before a deal in your CRM is permitted to move from `Closed-Won / Deposit Paid` to `Scheduled for Kickoff / Dispatch` , every mandatory field in the **Sales-to-Fulfillment Data Contract** must be populated and validated. Define your non-negotiable intake fields across your primary service lines below.

1.1 Universal Deal & Billing Verification Fields (Stage 1 Webhook Gate)

Field ID	Data Contract Field Name	Source System (Stripe / QBO / CRM / E-Sign)	Validation Rule (Deterministic Check)	Fallback Action if Missing
`ONB-01`	**Verified Payment Event ID**	`[ ] Stripe [ ] Square [ ] QBO [ ] Xero`	`payment_status == "paid"` AND `amount_paid ≥ required_deposit`	Hold onboarding; alert billing channel `#finance-alerts`

Field ID	Data Contract Field Name	Source System (Stripe / QBO / CRM / E-Sign)	Validation Rule (Deterministic Check)	Fallback Action if Missing
`ONB-02`	**Countersigned Proposal / SOW URL**	`[ ] PandaDoc [ ] DocuSign [ ] HighLevel`	Signed PDF URL returns HTTP `200 OK` and non-empty file size	Re-send signature link automatically via SMS/email
`ONB-03`	**Selected Package Tier**	`[ ] Core [ ] Pro [ ] Complete`	Exact match against approved SKU code in Pricebook	Flag account manager in `#onboarding-exceptions`
`ONB-04`	**Primary Decision-Maker Contact**	CRM Contact Record	Valid mobile E.164 phone + deliverable email address	Prompt sales rep to complete contact record
`ONB-05`	**On-Site / Day-of-Service Contact**	Intake Form / CRM Record	Name, mobile number, and role (if different from payer)	Request inside Stage 2 Welcome Intake Form
`ONB-06`	**Promised Delivery / Target Window**	Signed SOW / Estimate Record	Valid ISO date (`YYYY-MM-DD`) >= `today + minimum_lead_time_days`	Flag scheduling conflict before confirming slot

1.2 Vertical-Specific Prerequisite & Asset Checklist (Stage 3 Gate A)

Complete the row that matches your business model and add your custom technical prerequisites:

Business Archetype	Mandatory Customer Assets / Photos / Prerequisites Required Before Dispatch or Kickoff	File / Data Validation Criteria (Checked by `Prompt 5.3`)	Who Reviews Amber Flags?
Home & Field Services *(HVAC, Plumbing, Electrical, Solar, Remodeling, Landscaping)*	1. Wide-angle photo of existing unit/panel/install area 2. Close-up photo of manufacturer model/serial plate 3. Gate/lockbox access code & pet containment confirmation 4. HOA or municipal permit approval (if required)	Minimum `1080p` image resolution; serial plate legible via OCR; gate code populated (`≠ "N/A"`)	Dispatch Coordinator: `_____`

Business Archetype	Mandatory Customer Assets / Photos / Prerequisites Required Before Dispatch or Kickoff	File / Data Validation Criteria (Checked by `Prompt 5.3`)	Who Reviews Amber Flags?
B2B Agencies & Professional Studios *(Web, Marketing, Accounting, Legal, IT/MSP)*	1. Completed brand/technical questionnaire 2. High-resolution vector logo (`.svg` or `.eps`) & brand guide 3. Verified admin/delegated access to DNS, CMS, Ad Accounts, or Books 4. Approved point-of-contact for weekly milestone sign-offs	Access tokens verified active; vector file format confirmed; questionnaire `100%` of required fields answered	Account Manager: `_____`
Clinical, Medical, Dental & Wellness Practices	1. Completed HIPAA/privacy consent & medical history form 2. Front and back photos of active insurance card + photo ID 3. Prior imaging/records release or current medication list 4. Signed financial responsibility & cancellation policy	Insurance member ID & group number legible; consent signature timestamped; zero blank mandatory health screening questions	Patient Coordinator: `_____`
Custom Retail, Manufacturing & Specialty E-Commerce	1. Exact measurements / sizing specification sheet 2. Custom artwork / engraving proof sign-off 3. Commercial loading-dock or residential delivery window confirmation 4. Tax-exempt resale certificate (for wholesale buyers)	Proof approval checkbox = `TRUE` ; dimensions within machine tolerances (`min/max` bounds)	Fulfillment Lead: `_____`
Your Custom Prerequisite #1:	`_____`	`_____`	Owner/Lead: `_____`
Your Custom Prerequisite #2:	`_____`	`_____`	Owner/Lead: `_____`

Part 2: Customer Welcome Packet & Expectation-Setting Checklist (`Prompt 5.2`)

Within **60 seconds** of payment confirmation, Stage 2 of the Zero-Drop Handoff Protocol dispatches a personalized Welcome Email and concise SMS confirmation. Audit your Welcome Packet against the 10 mandatory trust elements below:

- [ ] **Element 1 — Immediate Gratitude & Deposit Receipt Confirmation:** Explicitly confirms the exact dollar amount received (`$_____`) and the package tier selected (`Core / Pro / Complete`) so the customer knows their transaction succeeded.
- [ ] **Element 2 — Named Human Point of Contact:** Introduces the specific Project Manager, Field Supervisor, or Care Coordinator (`Name: _____` , `Direct Role: _____`) so the customer never feels handed off to a faceless queue.
- [ ] **Element 3 — The "What Happens Next" 3-Step Visual Timeline:** Lists the exact chronological milestones (e.g., *Step 1: Complete 4-Minute Intake Form within 24 Hours -> Step 2: Technical Spec Verification & Calendar Release -> Step 3: Kickoff / Installation Day*).
- [ ] **Element 4 — Single Pre-Filled Dynamic Intake Link:** Provides a one-click URL (`https://_____`) with the customer's name, email, phone, and package ID already pre-populated via URL query parameters (`?deal_id={{deal_id}}&email={{email}}`).
- [ ] **Element 5 — Exact Time Estimate for Intake Completion:** States clearly how long the intake takes (e.g., "*Takes 4 minutes on your phone*") and why completing it immediately protects their target delivery date.
- [ ] **Element 6 — Communication Boundaries & SLA Rules:** Defines your normal response window (e.g., "*Same-day response for all messages received between 8:00 AM and 5:00 PM*"), official communication channels, and emergency contact rules.
- [ ] **Element 7 — Scope-Protection Reminder:** Gently reinforces what is included in their selected tier and how optional add-ons or change requests are handled transparently.
- [ ] **Element 8 — Automated Client Folder / Portal Provisioning:** Automatically creates a dedicated Google Drive, SharePoint, Notion, or Client Portal folder (`[Client Name] - [Deal ID] - Onboarding`) and logs the folder URL back into the CRM deal record.
- [ ] **Element 9 — Stop-Logic on Sales Nurture Sequences:** Immediately removes the customer from all open-quote chasers (`Chapter 4`) so they never receive an embarrassing "*Still thinking about your quote?*" text after paying.
- [ ] **Element 10 — Companion SMS Notification:** Sends a short, high-deliverability SMS within 60 seconds of payment:

> *"Hi {{first_name}}, thank you! Your deposit for {{package_name}} at {{company_name}} is confirmed. We just emailed your Welcome Packet & 4-minute setup link to {{email}}. Complete that today to lock in your kickoff slot! — {{coordinator_name}}"*

Part 3: Automated Missing-Asset Chaser Schedule (`Prompt 5.3`)

Never allow a highly paid technician, clinician, designer, or account manager to spend hours manually chasing clients for missing photos, forms, or logins. Configure your automated **3-Touch Missing-Asset Chaser Loop** below. The automation runs `Prompt 5.3` every time an intake form is partially submitted or remains incomplete after 24 hours.

3.1 Chaser Timing, Channel & Escalation Matrix

Chaser Stage	Trigger Timing & Condition	Delivery Channel	Core Message Angle (`Prompt 5.3` Dynamic Output)	Stop Condition	Escalation Action if Unresolved
Touch 1: Helpful Specificity	**+24 Hours** post-deposit if `intake_completeness_score < 100%`	**SMS + Email** *(8:00 AM–8:00 PM Local)*	Thanks client for completed items (`{{completed_items}}`), lists the exact 1–2 missing/blurry items (`{{missing_items}}`), and provides direct mobile upload link.	Stops immediately when `completeness == 100%`	Logs `Chaser_1_Sent` in CRM
Touch 2: Timeline Protection	**+72 Hours (Day 3)** post-deposit if still `< 100%`	**Email + SMS**	Explains how providing the remaining item (`{{missing_items}}`) today keeps their target kickoff/installation date (`{{target_date}}`) on schedule; offers 1-reply help if stuck.	Stops immediately when `completeness == 100%`	Updates deal status to `Onboarding - Awaiting Client Assets`
Touch 3: Provisional Hold Warning	**+120 Hours (Day 5)** post-deposit if still `< 100%`	**Email + Priority Staff Task**	Polite notice that their provisional calendar slot is held for 24 more hours pending `{{missing_items}}` ; creates a 5-minute phone walkthrough task for the coordinator.	Stops immediately when `completeness == 100%`	Posts Amber Alert in `#onboarding-ops` for human call

3.2 Pre-Appointment / Pre-Installation Readiness Sequence (`Prompt 5.4`)

Once `intake_completeness_score == 100%` and the calendar slot is confirmed, configure your automated no-show and site-readiness reminders:

Reminder Window	Channel	Required Customer Action / Readiness Verification	Configured in Tool?
72 Hours Prior	Email + SMS	Site/meeting preparation checklist (clear workspace, pet containment, decision-maker attendance, required materials ready)	`[ ] Yes [ ] No`
24 Hours Prior	SMS (Interactive)	*"Reply `1` to Confirm or `2` to Reschedule"* — `1` marks appointment `Confirmed` in CRM; `2` triggers Amber Alert to backfill the slot	`[ ] Yes [ ] No`
2 Hours Prior	SMS	Technician En-Route GPS link + photo bio OR Virtual Kickoff Zoom/Meet URL + 3-bullet agenda	`[ ] Yes [ ] No`

Part 4: Internal Staff Delivery Brief Template (`Prompt 5.1` & `Prompt 5.5`)

Your fulfillment team should never have to read a 40-message sales email chain or listen to a 30-minute discovery call recording to figure out what was sold. Configure your automation bridge (Make / Zapier / n8n) to pass the **Signed SOW + Sales Discovery Notes + Validated Customer Intake Data** into `Prompt 5.1` and `Prompt 5.5`, generating the standardized **1-Page Internal Staff Delivery Brief** below.

```

Part 5: First-7-Day Onboarding SLA & Bottleneck Tracker

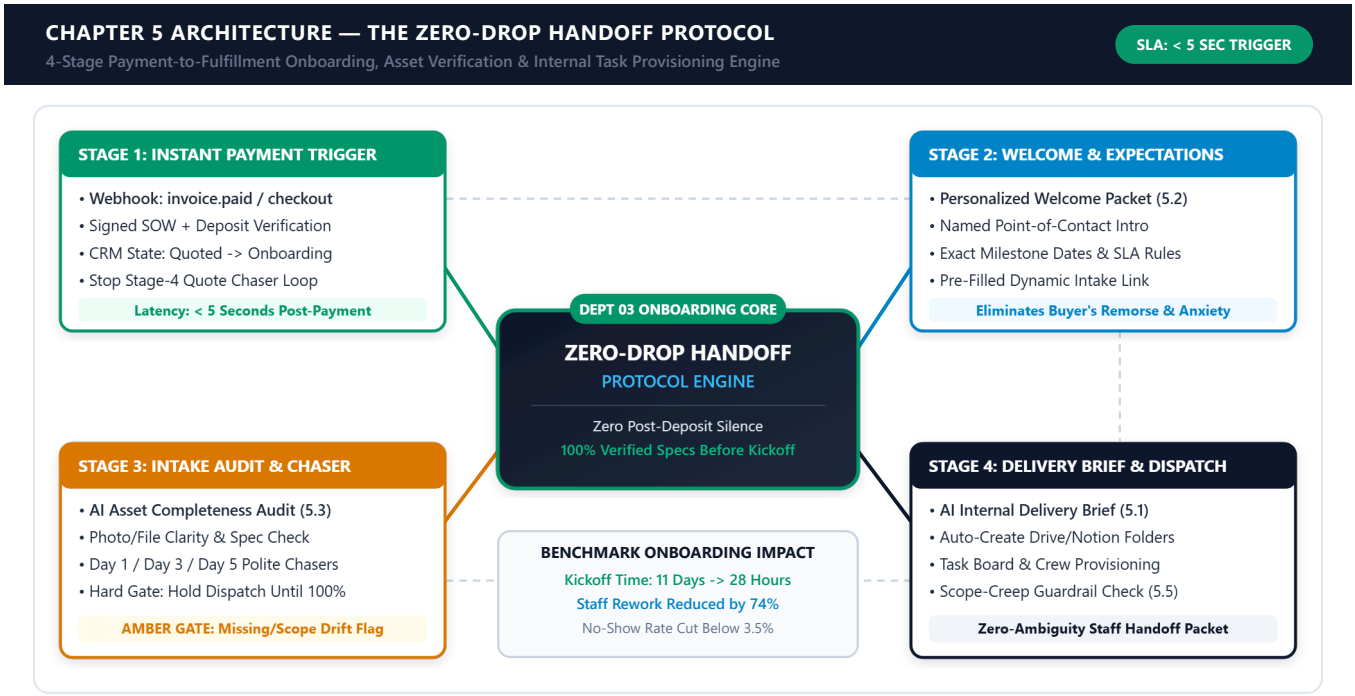

Review these five onboarding metrics every Friday during your 15-Minute Owner Scorecard review (`Chapter 10`). Track your baseline performance before automation alongside your Week 4 and Week 8 automated performance.

Metric ID	Onboarding KPI Name	Formula / Measurement Definition	Baseline (Manual)	Target Benchmark (Automated OS)	Week 4 Actual	Week 8 Actual
`KPI-5.1`	**Payment-to-Welcome Latency**	Median seconds from `invoice.paid` webhook to Welcome Packet + SMS delivery	`_____ hrs`	`< 60 seconds`	`_____ _ sec`	`_____ _ sec`
`KPI-5.2`	**48-Hour Intake Completion Rate**	`%` of new customers who submit `100%` of required assets within 48 hours of deposit	`_____ %`	`≥ 85.0%`	`_____ _ %`	`_____ _ %`
`KPI-5.3`	**Payment-to-Kickoff Cycle Time**	Average hours from deposit payment to verified, ready-to-execute kickoff/dispatch	`_____ days`	`< 36 hours`	`_____ _ hrs`	`_____ _ hrs`
`KPI-5.4`	**First-Time Spec Accuracy Rate**	`%` of jobs/projects that require zero mid-job delays due to missing specs or wrong parts	`_____ %`	`≥ 96.0%`	`_____ _ %`	`_____ _ %`
`KPI-5.5`	**Appointment / Kickoff No-Show Rate**	`%` of scheduled kickoffs or field visits missed or cancelled within `< 24 hours`	`_____ %`	`≤ 3.5%`	`_____ _ %`	`_____ _ %`

Worksheet 6: Support Knowledge Base & Escalation Rules Matrix

Companion to: Chapter 6 — *24/7 AI Customer Support Triage, FAQ Resolution & Smart Escalation*
Framework Reference: *The 3-Tier Support Shield (Grounded Single-Source Knowledge Base -> Tier 1 Green-Zone Autonomous Resolution -> Tier 2 Amber-Zone Assisted Drafts -> Tier 3 Red-Zone Urgent VIP & Safety Takeover)*
Department Engine: `Dept 03 — Customer Experience & 24/7 Support Triage`
Estimated Completion Time: 60 Minutes
Interactive Companion: Pre-configured inside the Notion Small Business OS (`06-NOTION-TEMPLATES/`) and the Pro Web App Suite (`07-INTERACTIVE-TOOLS/index.html` — Access Code: `SMALLBIZ-OS-PRO-2026`).

Instructions for the Owner & Support Manager

An AI customer support system is only as safe and accurate as the **Single-Source Knowledge Base** it reads from and the **Deterministic Escalation Boundaries** that govern when it must hand the conversation to a human. When small businesses deploy generic chatbots without strict policy grounding, they suffer two opposite failures: either the bot gives vague, unhelpful answers that frustrate buyers, or it invents unauthorized refund promises and scheduling exceptions.

Use this 5-part operational workbook to audit your **Top 25 Repetitive Customer Inquiries**, codify your **Single-Source Policy & Refund Boundary Sheet**, configure your **Tier 1 / Tier 2 / Tier 3 Routing Rules Matrix**, establish your **Red-Zone Escalation Trigger Keyword Registry**, and institute a **15-Minute Weekly AI Support Accuracy Audit Log**.

Part 1: Top 25 Repetitive Customer Inquiry Audit Table (`Prompt 6.1`)

Export your last 90 days of sent emails, SMS replies, social DMs, and support tickets, and run them through `Prompt 6.1` (*Raw Ticket/Email History to Structured Support Knowledge-Base Compiler*). Record your highest-volume inquiry categories below to identify the 60% to 75% of tickets eligible for **Tier 1 Green-Zone Autonomous Resolution**.

Policy Chunk ID	Inquiry Category & Exact Customer Question Pattern	Monthly Ticket Volume	Current Avg Human Time per Ticket	Required Live Data Lookup (Read-Only API)	Assigned Shield Tier (`Tier 1 / 2 / 3`)
`KB-ORD-01`	**Order / Shipment Status:** *"Where is my order / When will my package arrive?"*	`_____ / mo`	`4.5 mins`	Shopify / WooCommerce / ShipStation Tracking API	**Tier 1 (Green)**

Policy Chunk ID	Inquiry Category & Exact Customer Question Pattern	Monthly Ticket Volume	Current Avg Human Time per Ticket	Required Live Data Lookup (Read-Only API)	Assigned Shield Tier (`Tier 1 / 2 / 3`)
`KB-SCH-01`	**Appointment Rescheduling (> 24h Notice):** *"Can I move my appointment to next week?"*	`_____ / mo`	`6.0 mins`	Calendly / HighLevel / Jobber Booking Link	**Tier 1 (Green)**
`KB-HRS-01`	**Hours, Location, Parking & Service Area:** *"Are you open Saturday? Do you serve my ZIP?"*	`_____ / mo`	`3.0 mins`	Static Policy Chunk `KB-HRS-01` + ZIP Table	**Tier 1 (Green)**
`KB-PRP-01`	**Pre-Visit / Product Usage Instructions:** *"How do I prepare for my visit / use this item?"*	`_____ / mo`	`5.0 mins`	Static Policy Chunk `KB-PRP-01`	**Tier 1 (Green)**
`KB-INV-01`	**Duplicate Receipt / Invoice Copy Request:** *"Can you send me a paid receipt for tax/insurance?"*	`_____ / mo`	`5.5 mins`	Stripe / QuickBooks / Xero Invoice PDF URL	**Tier 1 (Green)**
`KB-SIZ-01`	**Product Sizing / Compatibility / Spec Check:** *"Will part X fit model Y? Which size fits me?"*	`_____ / mo`	`6.0 mins`	Approved Compatibility Matrix `KB-SIZ-01`	**Tier 1 (Green)**
`KB-RET-01`	**Standard Return / Exchange Within Policy Window:** *"How do I return an unopened item (< 30 days)?"*	`_____ / mo`	`5.0 mins`	Order Date Check + Return Portal URL	**Tier 1 (Green)**
`KB-RET-02`	**Goodwill Credit / Late Return / Damaged Item (< $75):** *"Item arrived scratched / 5 days past window"*	`_____ / mo`	`9.0 mins`	Order History + Photo Attachment Check	**Tier 2 (Amber)**
`KB-SCH-02`	**Late Cancellation / Same-Day Reschedule Fee Waiver:** *"Something came up today, can you waive the fee?"*	`_____ / mo`	`8.0 mins`	CRM Customer LTV + Past Attendance Count	**Tier 2 (Amber)**
`KB-TEC-01`	**Multi-Step Technical Troubleshooting:** *"I followed the guide and still get error code E-04"*	`_____ / mo`	`12.0 mins`	Technical SOP `KB-TEC-01` + Ticket History	**Tier 2 (Amber)**
`KB-BIL-01`	**Billing Dispute / Double Charge / High Refund (≥ $75):** *"You charged my card twice / I want a full refund"*	`_____ / mo`	`15.0 mins`	Stripe / QBO Ledger + CRM Timeline	**Tier 3 (Red)**

Policy Chunk ID	Inquiry Category & Exact Customer Question Pattern	Monthly Ticket Volume	Current Avg Human Time per Ticket	Required Live Data Lookup (Read-Only API)	Assigned Shield Tier (`Tier 1 / 2 / 3`)
`KB-VIP-01`	**Angry Sentiment (`< -0.50`) / Legal / Safety / Property Damage:** "*Your crew broke my pipe / calling my lawyer*"	`_____ / mo`	`25.0 mins`	Full Account Dossier + Immediate Bot Pause	**Tier 3 (Red)**
`KB-CUS-01`	`_____`	`_____ / mo`	`____ mins`	`_____`	`Tier ___`
`KB-CUS-02`	`_____`	`_____ / mo`	`____ mins`	`_____`	`Tier ___`
`KB-CUS-03`	`_____`	`_____ / mo`	`____ mins`	`_____`	`Tier ___`
`KB-CUS-04`	`_____`	`_____ / mo`	`____ mins`	`_____`	`Tier ___`
`KB-CUS-05`	`_____`	`_____ / mo`	`____ mins`	`_____`	`Tier ___`

Part 2: Single-Source Policy & Refund Boundary Sheet

Fill in the exact numeric and operational rules below. These exact figures are injected into your **Single-Source Knowledge Base (`02-ARCHITECTURE/` / Notion KB)** so `Prompt 6.3` and `Prompt 6.4` never guess or improvise company policy.

2.1 Financial, Return & Cancellation Boundaries

Policy Parameter	Exact Deterministic Rule / Numeric Boundary	Tier 1 Autonomous Authority	Tier 2 Staff One-Click Authority	Tier 3 Owner-Only Authority
Standard Return / Refund Window	`____` Calendar Days from delivery/purchase	Share return portal link if `< ____ days` & unopened	Approve up to `____` days grace period	Any exception beyond `____` days

Policy Parameter	Exact Deterministic Rule / Numeric Boundary	Tier 1 Autonomous Authority	Tier 2 Staff One-Click Authority	Tier 3 Owner-Only Authority
Monetary Refund / Credit Cap	Max automated goodwill credit = `$0.00`	`$0.00` (Zero autonomous cash refunds)	`$0.01` to `$_____` (e.g., `$75.00`)	Above `$_____` (e.g., `> $75.00`)
Replacement / Re-Ship Authority	Verified carrier lost/damaged with photo	Collect photo & tracking number	One-click replacement up to `$_____` COGS	Replacement above `$_____` COGS
Appointment Reschedule Notice	Minimum `____` hours advance notice required	Self-serve reschedule link if `≥ ____ hrs`	Waive late fee once if customer LTV `≥ $_____`	Repeat no-shows or VIP disputes
Service Warranty / Redo Window	Workmanship covered for `____` days post-service	Provide warranty terms & photo upload link	Schedule warranty tech check + draft reply	Third-party damage or cash claim
Price-Match / Promo Retroactivity	Within `____` days of purchase	Explain policy rules only	Issue store credit up to `$_____`	Cash price adjustment

2.2 Canonical Markdown Knowledge Chunk Template

Every entry in your Single-Source Knowledge Base must follow this exact 6-field structure so retrieval accuracy exceeds `98%`:

```
### Policy Chunk ID: [KB-CATEGORY-NUMBER]
- **Title:** [Clear, specific policy name]
- **Last Verified Date:** [YYYY-MM-DD] | **Policy Owner:** [Role/Name]
- **Customer Question Triggers:** [3-5 common ways customers phrase this question]
- **Exact Approved Policy Answer:** [Crystal-clear, factual explanation with exact numbers, timeframes, and URLs]
- **Hard Exceptions & Boundaries:** [What is strictly NOT allowed under this policy]
- **Escalation Rule:** [When the AI must route this inquiry to Tier 2 Amber or Tier 3 Red]
```

Part 3: The 3-Tier Support Shield Triage Rules Matrix (`Prompt 6.2`)

Configure your automation router (Make / Zapier / n8n / HelpScout / Gorgias / Front / HighLevel) using the deterministic conditions below:

Routing Dimension	Tier 1: Green Zone (Autonomous Instant Reply)	Tier 2: Amber Zone (AI Draft + Staff 1-Click Approval)	Tier 3: Red Zone (Bot Suppression + Manager Alert)
Target Share of Volume	**60% – 75%** of all inbound messages	**20% – 30%** of all inbound messages	**5% – 10%** of all inbound messages
Target Response SLA	`< 30 Seconds` (24/7/365)	`< 2 Business Hours`	`< 15 Minutes` (Immediate SMS/Slack Alert)
AI Confidence Score (`0.00–1.00`)	`confidence_score ≥ 0.90` AND valid `policy_chunk_id` cited	`0.65 ≤ confidence_score < 0.90` OR multi-policy synthesis	Any confidence score when Red-Zone trigger is present
Customer Sentiment Score (`-1.0 to +1.0`)	`sentiment_score ≥ -0.15` (Neutral to Positive)	`-0.50 ≤ sentiment_score < -0.15` (Mild frustration/urgency)	`sentiment_score < -0.50` (High anger/hostility)
Financial / Refund Exposure	`$0.00` (Informational / status / self-serve link only)	`$0.01` to `$75.00` (Or within Tier 2 staff cap)	`> $75.00`, chargeback threat, or disputed invoice
AI Action Executed	Sends grounded reply via `Prompt 6.3` + logs resolution in CRM	Posts internal Context Whisper + Draft Reply (`Prompt 6.4`) to Slack/Helpdesk	Immediately sets `ai_auto_reply = FALSE` + generates Executive Recovery Brief (`Prompt 6.5`)
Human Escape Hatch	Every Tier 1 message includes footer: "*Reply HUMAN anytime to speak with our team.*"	Staff clicks `[Approve & Send]`, `[Edit Reply]`, or `[Escalate]`	Owner or Manager calls/emails customer directly using 3-option recovery brief

---

Part 4: Red-Zone Escalation Trigger Keyword & Pattern Registry

Your pre-AI deterministic router must scan every inbound email, SMS, chat message, and social DM against the **Red-Zone Keyword & Pattern Registry** below. If **any** pattern matches, the ticket bypasses Tier 1 and Tier 2 immediately and triggers **Tier 3 Red-Zone Takeover**.

4.1 Mandatory Universal Red-Zone Triggers

- [ ] **Category A — Legal, Regulatory & Chargeback Threats:**
  `lawyer`, `attorney`, `lawsuit`, `small claims`, `sue`, `legal action`, `chargeback`, `dispute the charge`, `fraud`, `unauthorized charge`, `Better Business Bureau`, `BBB`, `Attorney General`, `FTC`, `trading standards`, `ombudsman`, `licensing board`, `health department`, `OSHA`.
- [ ] **Category B — Physical Safety, Injury, Illness & Property Damage:**
  `injured`, `hurt`, `bleeding`, `hospital`, `urgent care`, `allergic reaction`, `rash`, `chemical burn`, `swelling`, `smoke`, `sparks`, `burning smell`, `gas leak`, `carbon monoxide`, `flooding`, `burst pipe`, `water damage`, `property damage`, `broke my`, `ruined my`.

- [ ] **Category C — Public Reputation & Viral Escalation Threats:** `1-star`, `one star`, `worst company`, `scam`, `rip-off`, `posting on Google`, `Yelp review`, `Reddit`, `TikTok`, `local news`, `warn everyone`.
- [ ] **Category D — Human Override & Bot Frustration Signals:** `HUMAN`, `AGENT`, `MANAGER`, `OWNER`, `SUPERVISOR`, `real person`, `stop messaging me`, `stupid bot`, `talk to a human`, or `≥ 3` consecutive customer replies within 10 minutes without resolution.
- [ ] **Category E — VIP & High-Value Account Protection:** `customer_lifetime_value ≥ $_____` OR `account_tag == "VIP"` OR `open_deal_value ≥ $_____` combined with any negative sentiment (`sentiment_score < 0.0`).

4.2 Custom Industry Red-Zone Keywords for Your Business

Write 5 to 10 industry-specific emergency or high-risk words that should immediately trigger Tier 3 human takeover in your business: 1. _____ (e.g., *"no heat"*, *"website down"*, *"crown fell out"*, *"payroll failed"*) 2. _____ 3. _____ 4. _____ 5. _____ 6. _____

Part 5: Weekly AI Support Accuracy Audit Log (15-Minute Friday Ritual)

Every Friday afternoon, the Support Lead or Owner spends 15 minutes reviewing a random sample of **10 Tier-1 Auto-Resolved Tickets** and **all Tier-2 Human-Edited Drafts** from the past 7 days. Every time a staff member had to edit a Tier-2 AI draft because a policy detail was missing from the Knowledge Base, add that missing rule to your Single-Source KB so the AI gets smarter every week.

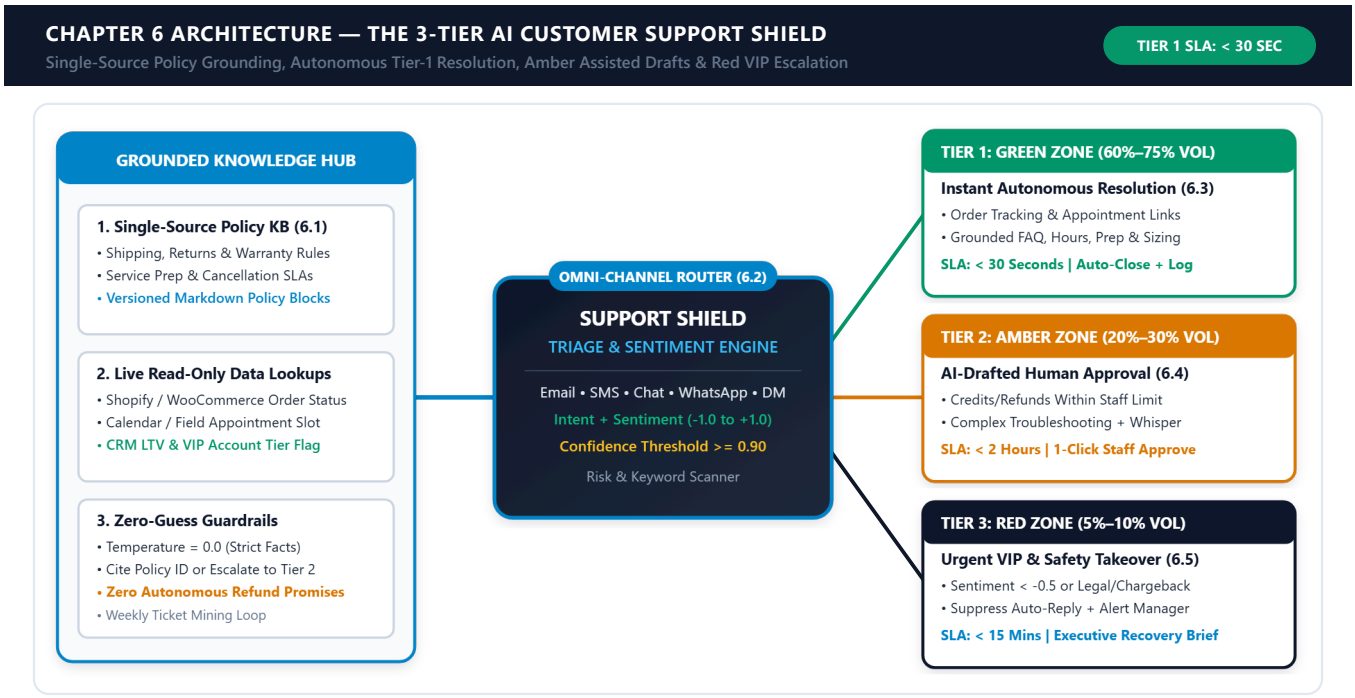

Week Ending Date	Total Inbound Tickets	Tier 1 Auto-Resolved (`#` / `%`)	Tier 2 Assisted (`#` / `%`)	Tier 3 Escalated (`#` / `%`)	Tier 1 Fact-Check Accuracy (`10-Ticket Audit`)	New / Updated KB Policy Chunks Added This Week	Support CSAT Score (`%` or `/5.0`)
Baseline (Pre-OS)	_____	`0 (0%)`	`0 (0%)`	`100% Manual`	`N/A`	`Initial 25 Chunks Compiled`	_____
Week 1: ____/____	_____	____ (___%)	____ (___%)	____ (___%)	____ / 10 (___%)	`Chunk IDs:` _____ _____	_____
Week 2: ____/____	_____	____ (___%)	____ (___%)	____ (___%)	____ / 10 (___%)	`Chunk IDs:` _____ _____	_____
Week 3: ____/____	_____	____ (___%)	____ (___%)	____ (___%)	____ / 10 (___%)	`Chunk IDs:` _____ _____	_____

Week Ending Date	Total Inbound Tickets	Tier 1 Auto-Resolved (# / %)	Tier 2 Assisted (# / %)	Tier 3 Escalated (# / %)	Tier 1 Fact-Check Accuracy (10-Ticket Audit)	New / Updated KB Policy Chunks Added This Week	Support CSAT Score (% or /5.0)
Week 4: ____/____	_____	____ (___%)	____ (___%)	____ (___%)	____ / 10 (___%)	Chunk IDs: _____ _____	_____
Week 8: ____/____	_____	____ (___%)	____ (___%)	____ (___%)	____ / 10 (___%)	Chunk IDs: _____ _____	_____
Target Benchmark	*All Channels*	**60% – 75%**	**20% – 30%**	**5% – 10%**	**10 / 10 (100%)**	*+2 to 4 Chunks / Week*	**≥ 95.0%**

Support Shield Deployment Sign-Off

- **Single-Source Knowledge Base Populated (≥ 25 Verified Policy Chunks):** [ ] Verified Live

- **Prompts 6.1 through 6.5 Connected to Helpdesk / Inbox Router:** [ ] Verified Live
- **Sign-Off Date:** ____ / ____ / 2026 | **Owner / Support Lead Signature:** _____

Chapter 6 System Mindmap Quick-Reference Diagram

Interactive Implementation Notes & Owner Sign-Off (Worksheet 06):
Assigned Champion: _____ | Target Go-Live Date: ____/____/2026 | Gate Status: [ ] Green [ ] Amber

Worksheet 7: Review Funnel & Dormant Customer Win-Back Sheet

Companion to: Chapter 7 — *Automated Customer Retention, Review Generation & Reactivation Campaigns*
Framework Reference: *The R.E.V.I.E.W. & Win-Back Flywheel (Real-Time Completion Trigger -> Emotional Sentiment Pulse -> Velocity Public Review Routing -> Internal Service Recovery -> Automated SEO Review Responder -> Win-Back & Referral Engine)*
Department Engine: `Dept 03 – Customer Retention, Reputation & LTV Reactivation`
Estimated Completion Time: 45 Minutes
Interactive Companion: Pre-configured inside the Notion Small Business OS (`06-NOTION-TEMPLATES/`) and the Pro Web App Suite (`07-INTERACTIVE-TOOLS/index.html` — Access Code: `SMALLBIZ-OS-PRO-2026`).

Instructions for the Owner & Growth Lead

Acquiring a brand-new customer via Google Local Service Ads, search clicks, or paid social media costs **5 to 7 times more** than generating a repeat booking or referral from an existing happy customer. Yet most small businesses treat reputation management and customer retention as random manual tasks: they forget to ask for Google reviews at the moment of peak customer delight, let negative experiences fester until they appear online as 1-star reviews, and leave thousands of past customers sitting untouched in their CRM or invoicing software for years.

Use this 5-part operational workbook to map your **Peak-Satisfaction Trigger Events**, configure your **FTC/Google-Compliant Sentiment Pulse & Private Service Recovery Protocol**, standardize your **Local SEO Review Response Matrix**, build your **60/90/180-Day Dormant Customer Win-Back Offers**, and track your **Monthly Retention & Referral KPI Scorecard**.

Part 1: Peak-Satisfaction Trigger Mapping Grid (`Stage R`)

A review request converts at **3x to 5x higher rates** when it arrives at the exact moment the customer experiences the tangible benefit of your product or service—and when customers with an open support ticket or billing dispute are automatically excluded. Define your exact trigger events and suppression gates below.

Service / Product Line	Exact CRM / POS / Shipping Trigger Event	Optimal Delay Window Before Pulse Check	Mandatory Suppression Check (Do NOT Send If...)	Primary Review Destination URL (`Google / Trustpilot / Industry`)
Field & Home Services *(HVAC, Plumbing, Electrical, Auto, Cleaning)*	Technician marks work order `Completed & Signed Off` + Invoice `Paid`	`+2 Hours` after technician departure	Open warranty flag, property-damage note, or unpaid balance	Google Business Profile Place ID Direct Review Link
Clinical, Dental, Medical & Aesthetics	Patient checkout completed in EHR/PMS (`Status == Checked Out`)	`+3 Hours` post-appointment (or `+24h` if sedation/recovery)	Clinical complication flag or open insurance billing dispute	Google Business Profile + Healthgrades / RealSelf
B2B Agencies & Professional Services	Client signs off on Milestone Deliverable OR 30-Day ROI Report	`+4 Hours` after milestone sign-off	Active scope dispute, missed deadline in last 14 days, or Amber/Red support ticket	Google Business Profile + Clutch / G2 / LinkedIn
E-Commerce & Specialty Retail	Carrier webhook `shipment.delivered` confirmed at customer address	`+48 Hours` (Apparel/Gear) or `+7 to 14 Days` (Skincare/Supplements)	Open return/exchange request, carrier damage claim, or Tier 2/3 ticket	Google Merchant / Trustpilot / Judge.me / Yotpo
Your Primary Offer #1: `_____`	Webhook / Status: `_____`	Delay: `_____ hrs/days`	Suppression rule: `_____`	URL: `https://_____`
Your Primary Offer #2: `_____`	Webhook / Status: `_____`	Delay: `_____ hrs/days`	Suppression rule: `_____`	URL: `https://_____`

Part 2: Post-Service Sentiment Pulse & Service Recovery Protocol (`Prompt 7.1` & `Prompt 7.3`)

2.1 FTC & Google Non-Gating Compliance Checklist

Both the U.S. Federal Trade Commission (FTC Consumer Review Rule) and Google Business Profile guidelines prohibit **illegal review gating**—the practice of offering incentives only for positive reviews or blocking dissatisfied customers from accessing public review links. Verify that your R.E.V.I.E.W. workflow follows all four compliance rules below:

- [ ] **Compliance Rule 1 — Universal Survey Phrasing:** The initial Sentiment Pulse asks neutrally about the customer's experience ("*On a scale of 1–10, how was your experience with {{company_name}} today?*") rather than asking if they will write a positive review.
- [ ] **Compliance Rule 2 — Public Review Link Never Blocked:** Even when a customer selects `1–8` and triggers the **Immediate Private Owner Recovery Workflow**, the public review link remains accessible in the page footer ("*Prefer to share a public review? Click here*"). Because the owner responds privately within 60 minutes to fix the issue, over `85%` of frustrated customers choose private resolution voluntarily.
- [ ] **Compliance Rule 3 — Zero Conditional Review Bribes:** Never offer discounts, gift cards, or rebates conditioned on leaving a *5-star* review.
- [ ] **Compliance Rule 4 — Authentic Customer Authorship:** The AI Review Helper (`Prompt 7.1`) provides optional memory-jogger bullet points (*service performed, technician name, speed of service*), but the customer writes and posts their own review on their own device.

2.2 Sentiment Routing & Private Make-Good Authorization Matrix (`Prompt 7.3`)

Define how your system routes each pulse score and pre-authorize the exact **Make-Good Recovery Menu** your manager or owner can deploy within 60 minutes to turn a frustrated buyer into a loyal advocate:

Pulse Score Range	Customer Segment	Automated System Action (`< 5 Seconds`)	Human Follow-Up SLA	Pre-Authorized Make-Good Resolution Options (Select 1 per Incident)
Score `9 – 10` *(Promoter)*	Delighted Advocate	Redirects immediately to 1-tap Google/Trustpilot link + displays 3 specific memory-jogger bullets (`Prompt 7.1`). Triggers `+72h` gentle nudge if unclicked, and `+14d` VIP Referral invite (`Prompt 7.5`).	None required (Automated)	Enters VIP Advocate segment after review completion.
Score `7 – 8` *(Passive / Minor Friction)*	Satisfied but Lukewarm	Displays warm thank-you + 1-question prompt: "*What is one thing we could have done to make your experience a 10?*" Sends Amber notification to Operations Lead.	**Within 4 Business Hours** (Personal email/SMS thank-you + fix)	**Option A:** Complimentary priority upgrade on next visit/order (`Value: $____`) **Option B:** Direct adjustment of minor billing/scheduling friction

Pulse Score Range	Customer Segment	Automated System Action (`< 5 Seconds`)	Human Follow-Up SLA	Pre-Authorized Make-Good Resolution Options (Select 1 per Incident)
Score `1 – 6` *(Detractor / Service Failure)*	At-Risk / Frustrated Customer	Fires **Red-Zone Alert** to `#urgent-recovery` + SMS to Owner. Pauses all automated marketing/review nudges. Generates **Executive Recovery Brief & Outreach Script (`Prompt 7.3`)**.	**Within 60 Minutes** (Personal phone call + SMS from Owner/GM)	**Option A:** Priority 24-hour senior technician/lead redo at `$0` charge **Option B:** Immediate service credit / partial fee refund up to `$_____` **Option C:** Full satisfaction guarantee replacement + personal apology

---

Part 3: Local SEO Public Review Response Matrix (`Prompt 7.2`)

Responding to 100% of public Google and Trustpilot reviews within **2 hours** signals active management to prospective buyers and feeds Google's local pack algorithm with verified service and geographic context. Configure `Prompt 7.2` using the rules below:

Star Rating	Execution Mode (`T.R.A.V.` Gate)	Target SLA	SEO & Brand Voice Rules Enforced by `Prompt 7.2`	Privacy & Legal Guardrail
5-Star Review *(With Text)*	**Green Zone** *(Auto-Publish or 1-Click Batch Approve)*	`< 2 Hours`	1. Address reviewer by first name 2. Reference specific detail/staff member they praised 3. Naturally weave in 1 primary service keyword + city/neighborhood (never stuffed) 4. Vary opening & closing phrasing across every review	Never disclose private address, clinical details, or contract pricing not mentioned by reviewer
5-Star Review *(Rating Only, No Text)*	**Green Zone** *(Auto-Publish)*	`< 2 Hours`	Warm, concise 2-sentence thank-you mentioning your core service category and city, inviting them back for their next visit	Keep under 45 words; zero generic copy-paste templates

Star Rating	Execution Mode (`T.R.A.V.` Gate)	Target SLA	SEO & Brand Voice Rules Enforced by `Prompt 7.2`	Privacy & Legal Guardrail
4-Star Review	**Amber Zone** *(1-Click Staff Approval)*	`< 4 Hours`	Thank reviewer warmly for positive highlights, acknowledge any noted friction point constructively, and share how your team is improving it	Zero defensiveness; invite direct reply if anything needs adjustment
1-Star to 3-Star Review	**Red/Amber Zone** *(Mandatory Owner Approval Before Posting)*	`< 2 Hours`	1. Calm, executive, empathetic tone (written for the thousands of future prospects reading it) 2. Zero arguing, blaming, or excuse-making 3. Move conversation offline immediately with direct owner contact (`{{owner_name}}` at `{{direct_phone_or_email}}`)	**Strict HIPAA / Confidentiality Guardrail:** Never confirm medical/clinical/legal specifics publicly—even if the reviewer states them first

Target Local SEO Keywords to Rotate Naturally in 5-Star Responses

List your top 5 high-margin services and top 3 geographic service areas for `Prompt 7.2` context injection: * **Primary Service Keywords:** 1. `_____` | 2. `_____` | 3. `_____` | 4. `_____` | 5. `_____` * **Primary Cities / Regions:** 1. `_____` | 2. `_____` | 3. `_____`

Part 4: 60 / 90 / 180-Day Dormant Customer Win-Back Offer Planner (`Prompt 7.4`)

Configure your automated **Dormant Customer Reactivation Engine** to scan your CRM/invoicing database daily for past customers with `last_purchase_or_visit_date` hitting **60, 90, or 180 days** (and `upcoming_appointments == 0` , `open_disputes == 0`).

Lifecycle Cohort	Trigger Day (`Days Since Last Job/Order`)	Psychological Hook & Personalized Context (`Prompt 7.4`)	Approved Value-Add Offer (Protects Gross Margin)	Stop-Logic & Frequency Cap
Cohort 1: Routine Refill / Check-In	**Day 60**	"*Checking in on your `{{last_service_or_product}}` from `{{last_visit_month}}` — everything running smoothly / ready for a replenish?*"	Priority 1-click booking slot OR free bonus consumable/shipping on reorder	Stops immediately upon reply, click-to-book, or purchase

Lifecycle Cohort	Trigger Day (`Days Since Last Job/Order`)	Psychological Hook & Personalized Context (`Prompt 7.4`)	Approved Value-Add Offer (Protects Gross Margin)	Stop-Logic & Frequency Cap
Cohort 2: Seasonal Maintenance / Recall	**Day 90** *(or 180 for Semi-Annual)*	*"Your `{{equipment_vehicle_or_account}}` is due for its seasonal checkup/tune-up to keep warranty & peak performance intact."*	Complimentary multi-point inspection / audit (`$____ Value`) included with standard booking	Max 1 SMS + 1 Email per 90-day window; respects `STOP` opt-outs
Cohort 3: Dormant Win-Back Credit	**Day 180 – 365**	*"We missed seeing you at `{{company_name}}` ! We've credited a returning-client reward to your account through `{{expiry_date}}` ."*	Returning Client Loyalty Credit of `$_____` (on minimum booking/order of `$_____`)	Valid for 14 days; auto-expires cleanly without nagging
VIP Advocate Referral Trigger (`Prompt 7.5`)	**+14 Days Post 5★ Review** *(or 3rd Repeat Order)*	*"Thank you again for your kind words! If a friend or colleague needs `{{service_category}}` , here is your VIP give-get link."*	**Dual-Sided Reward:** Friend gets `$____` off first booking; Advocate gets `$____` credit or gift upon completion	Maximum 2 referral invitations per customer per calendar year

---

Part 5: Monthly Retention, Review & Reactivation KPI Scorecard

Track these five compounding customer lifetime value (LTV) metrics on the first Friday of every month:

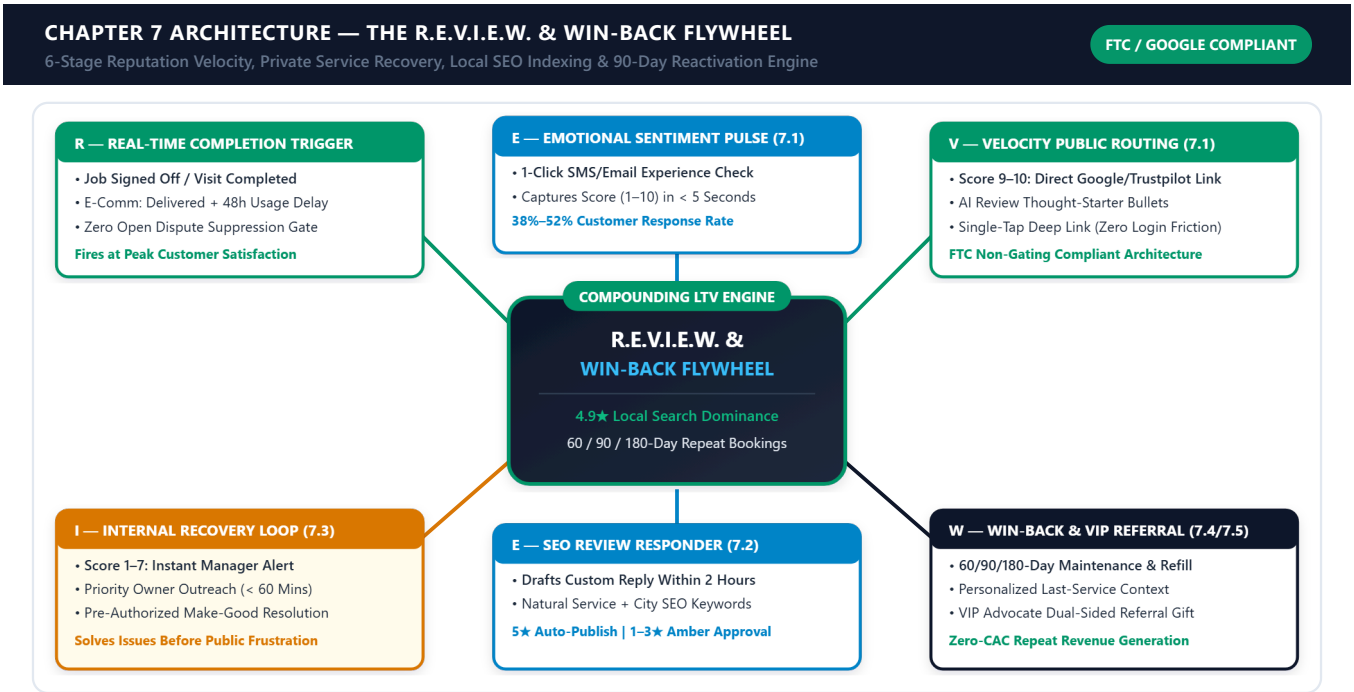

Metric ID	Retention & Reputation KPI	Calculation / Source	Baseline (Pre-OS)	Target Benchmark (90 Days Post-OS)	Month 1 Actual	Month 3 Actual
`KPI-7.1`	**Sentiment Pulse Response Rate**	`Pulse Replies / Completed Jobs or Orders Sent Pulse`	`_____ %`	`35.0% – 50.0%`	`_____ %`	`_____ %`
`KPI-7.2`	**Verified New Public Reviews / Month**	Net new Google + Trustpilot reviews published per 30 days	`_____ / mo`	`3x – 6x Baseline` (`4.8★+ Avg`)	`_____ / mo`	`_____ / mo`
`KPI-7.3`	**Private Service Recovery Save Rate**	`%` of `1–7` pulse scores resolved privately without public 1★ review	`_____ %`	`≥ 85.0%`	`_____ %`	`_____ %`
`KPI-7.4`	**90-Day Reactivation Conversion Rate**	`%` of contacted 60/90/180-day dormant customers who book/reorder	`_____ %`	`8.0% – 14.0%`	`_____ %`	`_____ %`

Metric ID	Retention & Reputation KPI	Calculation / Source	Baseline (Pre-OS)	Target Benchmark (90 Days Post-OS)	Month 1 Actual	Month 3 Actual
`KPI-7.5`	**Monthly Reactivation & Referral Revenue**	Gross monthly revenue attributed to Win-Back + VIP Referral links	`$_____ / mo`	`15% – 25% of Total Monthly Revenue`	`$_____ _ / mo`	`$_____ _ / mo`

R.E.V.I.E.W. Flywheel Deployment Sign-Off

- **Completion Trigger & Open-Dispute Suppression Filter Active:** `[ ] Verified Live`
- **FTC/Google Non-Gating Compliant Sentiment Pulse Deployed (`Prompt 7.1`):** `[ ] Verified Live`
- **60/90/180-Day Dormant Reactivation & VIP Referral Workflows Live (`Prompts 7.4 & 7.5`):** `[ ] Verified Live`
- **Sign-Off Date:** `____ / ____ / 2026` | **Owner / Growth Lead Signature:** `_____`

Chapter 7 System Mindmap Quick-Reference Diagram

Interactive Implementation Notes & Owner Sign-Off (Worksheet 07):
Assigned Champion: _____ | Target Go-Live Date: ___/___/2026 | Gate Status: [ ] Green [ ] Amber

Worksheet 8: Receivables Automation & Monthly Close Checklist

Companion to: Chapter 8 — *Back-Office Autopilot: Invoicing, Payment Chasers, Bookkeeping Prep & Vendor Triage*
Framework Reference: *The Cashflow Collection & Receipt Extraction Pipeline (Milestone Instant Invoicing -> 5-Stage Polite-to-Firm Payment Chaser Ladder -> OCR Receipt & Vendor Bill Triage -> 5-Day Monthly Bookkeeping Pre-Close)*
Department Engine: `Dept 04 — Back-Office Billing, Cashflow & Bookkeeping Prep`
Estimated Completion Time: 45 Minutes
Interactive Companion: Pre-configured inside the Notion Small Business OS (`06-NOTION-TEMPLATES/`), the 8-Tab Excel Command Center (`06-NOTION-TEMPLATES/Spreadsheets/`), and the Pro Web App Suite (`07-INTERACTIVE-TOOLS/index.html` — Access Code: `SMALLBIZ-OS-PRO-2026`).

Instructions for the Owner, Office Manager & Bookkeeper

Profit on an income statement does not pay Friday payroll—**collected cash in your operating bank account does**. In most 1–25 person businesses, cashflow crunches are caused by two preventable back-office habits: 1. **The "Friday/Sunday Billing Batch" Delay:** Waiting days or weeks after completing a job or milestone before generating and sending the customer invoice—and then feeling too awkward or busy to follow up systematically when an invoice goes past due. 2. **The "Month-End Shoebox" Scramble:** Letting field receipts, vendor PDF bills, and uncategorized credit card charges pile up for 30 days, resulting in hidden vendor price hikes, missed tax deductions, and financial statements that arrive three weeks too late to guide decisions.

Use this 5-part operational workbook to map your **Milestone Invoicing Triggers**, calculate your **Baseline Days Sales Outstanding (DSO) & Trapped Cash**, configure your **5-Stage Polite-to-Firm Payment Chaser Ladder**, standardize your **Vendor OCR & Chart-of-Accounts GL Mapping Grid**, and execute a **5-Day Monthly Bookkeeping Pre-Close**.

Part 1: Invoicing Trigger & Billing SLA Audit Table (`Prompt 8.1`)

Eliminate manual batch invoicing by tying every revenue stream in your business to a deterministic **Completion or Milestone Webhook** that runs `Prompt 8.1` (*Completed-Job Notes to Itemized Customer Invoice Line-Item Formatter*) within 60 seconds of work sign-off.

Revenue Stream / Billing Model	Exact Operational Trigger Event (POS / CRM / PM Tool)	Accounting Target (`QBO / Xero / Stripe / Square`)	Execution Gate (`Green Auto-Send` vs. `Amber 1-Click Approve`)	Target Billing SLA	Payment Methods Enabled on Link
1. Fixed-Price Field / Service Jobs *(HVAC, Electrical, Auto, Cleaning, Clinics)*	Technician/Clinician marks Work Order `Completed & Signed`	QuickBooks Online / Xero / Stripe Invoice	**Green Zone** *(If total matches signed estimate)*	`< 60 Seconds` post sign-off	`[ ] Card [ ] ACH [ ] Apple/Google Pay`
2. Progress / Milestone Projects *(Agencies, Construction, Custom Fabrication)*	Client signs off on Milestone Deliverable OR Project Board moves to `Milestone Complete`	QuickBooks / Xero Progress Invoice (`50% / 25% / 25%`)	**Amber Zone** *(1-Click PM Approval of `Prompt 8.1` memo)*	`< 2 Hours` of milestone completion	`[ ] ACH Bank Transfer [ ] Card`
3. Recurring Monthly Retainers / Memberships	Scheduled Cron on `1st` or `15th` of Month	Stripe Subscription / QBO Recurring Invoice	**Green Zone** *(Auto-charge stored payment method)*	`08:00 AM` on billing date	`[ ] Auto-Debit ACH [ ] Card on File`
4. Time-and-Materials / Change Orders	Approved Change Order or Weekly Logged Hours	QBO / Xero Itemized Invoice (`Prompt 8.1` translates tech notes)	**Amber Zone** *(Owner/Manager 1-Click review)*	**Every Friday by `12:00 PM`**	`[ ] ACH [ ] Card`
Your Billing Stream #1: _____	Trigger: _____	System: _____	`[ ] Green [ ] Amber`	SLA: _____	`[ ] ACH [ ] Card`
Your Billing Stream #2: _____	Trigger: _____	System: _____	`[ ] Green [ ] Amber`	SLA: _____	`[ ] ACH [ ] Card`

Part 2: Aged Receivables & Days Sales Outstanding (DSO) Calculator

Before activating your automated payment chasers, audit your current Accounts Receivable (AR) aging report from QuickBooks, Xero, Stripe, or FreshBooks to quantify how much working capital is currently trapped in unpaid customer invoices.

2.1 Current Accounts Receivable Aging Snapshot

AR Aging Bucket	Number of Open Invoices (#)	Total Dollar Balance ($)	% of Total Open AR	Historical Collection Probability	Immediate Action Required (Prompt 8.2)
Current (0 – Due Date)	_____	$_____	____ %	98%+	Enroll in Stage 1 (Day −3 Courtesy Pre-Due Reminder)
1 – 7 Days Past Due	_____	$_____	____ %	94%	Trigger Stage 2 (Day +1) & Stage 3 (Day +7) Chasers
8 – 15 Days Past Due	_____	$_____	____ %	85%	Trigger Stage 3 (Day +7) + Offer 2-Part Split / Card Link
16 – 30 Days Past Due	_____	$_____	____ %	72%	Route to Stage 4 (Day +15 Amber Gate — Work Pause Notice)
31 – 60 Days Past Due	_____	$_____	____ %	51%	Route to Stage 5 (Day +30 Red Gate — Owner Call + Script 02)
61+ Days Past Due	_____	$_____	____ %	< 28%	Final Demand Notice (Emergency Script 02) / Collections
TOTAL OPEN RECEIVABLES	_____	$_____	100%	—	**Target 60-Day Recovery: ≥ 75% of Past-Due Balance**

2.2 Days Sales Outstanding (DSO) & Trapped Working Capital Formula

Calculate your baseline DSO and the exact cash freed when the Chapter 8 pipeline reduces your DSO to your target (14 Days):

$$\text{Current DSO (Days)} = \left(\frac{\text{Total Open Accounts Receivable (\$)}}{\text{Total Credit/Invoiced Sales Over Last 90 Days (\$)}} \right) \times 90$$

$$\text{Working Capital Freed (\$)} = \left(\text{Current DSO} - \text{Target DSO} \right) \times \left(\frac{\text{Annual Invoiced Revenue (\$)}}{365} \right)$$

- **Your Total Open Accounts Receivable ($):** $_____
- **Your Invoiced Sales Over Last 90 Days ($):** $_____
- **Your Baseline DSO (Days):** _____ Days *(Small Business Manual Average: 38 to 46 Days)*
- **Your Target Automated DSO (Days):** 14 Days
- **Your Average Daily Invoiced Revenue (Annual / 365):** $_____ / day

- **Total Trapped Cash Unlocked into Your Bank Account:** `$_____`

Part 3: 5-Stage Payment Chaser Cadence & Stop-Logic Checklist (`Prompt 8.2`)

Configure your 5-stage overdue invoice follow-up sequence in QuickBooks/Xero + Make/Zapier/n8n using `Prompt 8.2`. Verify that every guardrail and stop-condition below is active before turning on the workflow:

Chaser Stage	Timing Trigger	Risk Gate Zone	Channel	Tone & Core Operational Hook (`Prompt 8.2`)	Mandatory Pre-Send Verification
Stage 1: Courtesy Pre-Due	**3 Days Before Due Date** (`Day -3`)	**Green Zone** *(Auto-Send)*	Email	Warm heads-up that Invoice `#{{inv_num}}` (`${{amount}}`) is due on `{{due_date}}`; includes 1-click ACH/Card link and attached PDF for their AP team.	Confirm `invoice_balance > $0` and `open_dispute == false`
Stage 2: Friendly Nudge	**1 Day Past Due** (`Day +1`)	**Green Zone** *(Auto-Send)*	Email + SMS	Assumes honest oversight ("*Inboxes get busy—resending your 1-click payment link for Invoice #{{inv_num}}*"). Zero accusation or friction.	Confirm bank/Stripe webhook has not recorded payment in last 24h
Stage 3: Helpful Check-In	**7 Days Past Due** (`Day +7`)	**Green Zone** *(Auto-Send)*	Email + SMS	Asks if their accounting department needs a W-9, PO number update, or a 2-part payment split link to clear the balance today.	Confirm no pending ACH settlement (`status ≠ "processing"`)
Stage 4: Firm Work-Pause Warning	**15 Days Past Due** (`Day +15`)	**Amber Zone** *(1-Click Owner/Mgr Approval)*	Email + SMS + Phone Task	Polite but firm executive notice: per service agreement terms, active work/deliveries/scheduling will pause in **48 hours** if balance remains unpaid.	**Human Approval Required:** Owner verifies no active handshake extension
Stage 5: Final Pre-Collections	**30 Days Past Due** (`Day +30`)	**Red Zone** *(Mandatory Owner Sign-Off)*	Certified Email + SMS (`Script 02`)	Formal notice of contractual late fee assessment (`{{late_fee_pct}}%`) and 7-day deadline before transferring file to collections/legal recovery.	**Owner Sign-Off Required:** Pause all recurring services immediately

Critical Stop-Logic Verification Checklist

- [ ] **Webhook Stop Condition 1 (`invoice.paid`):** Does the instant a payment is received in Stripe, Square, QuickBooks, or Xero set `invoice_balance = 0` and immediately terminate all scheduled Stage 1–5 chasers?
- [ ] **Webhook Stop Condition 2 (`payment.processing`):** If a B2B client initiates an ACH bank transfer on Day +2 (which takes 3–4 banking days to settle), does the router pause Stage 3 so the client is not nagged while their bank transfer is in flight?

- [ ] **Webhook Stop Condition 3 (`tier3_dispute_active`):** If the client has an open Tier 3 complaint ticket (`Chapter 6`), does the router route the overdue invoice to an Amber Manager Review instead of sending automated dunning texts?

Part 4: Vendor Receipt OCR & Chart-of-Accounts GL Mapping Grid (`Prompts 8.3 & 8.4`)

Create a dedicated forwarding email alias (`receipts@yourcompany.com` or `ap@yourcompany.com`) and a shared field-staff SMS/Slack upload channel. Whenever a vendor PDF invoice or receipt photo arrives, `Prompt 8.3` extracts the structured JSON fields and maps the expense to your exact Chart of Accounts below, while `Prompt 8.4` checks for vendor unit-price increases `> 5%` .

Standard GL Code	Account Category Name (`QBO / Xero`)	Common Vendor / Expense Examples	Required Job / Project Costing Tag?	Price-Creep Alert Threshold (`Prompt 8.4`)
`GL-5100`	**Cost of Goods Sold (COGS) — Materials & Parts**	Wholesale parts, lumber, clinical supplies, raw ingredients, packaging	`[X] YES` *(Require `Job_ID` or `Batch_ID`)*	Flag if unit price increases `> 5.0%` vs. 90-day baseline
`GL-5200`	**COGS — Subcontractors & Field Labor**	Specialty trade subcontractors, freelance production specialists	`[X] YES` *(Require `Job_ID` & Signed PO)*	Flag if total exceeds approved PO by `> $0.00`
`GL-6120`	**Vehicle, Fuel & Fleet Maintenance**	Gas station receipts, fleet oil/tire service, commercial auto insurance	`[ ] Optional` *(Tag `Truck_Number`)*	Flag single fuel receipt `> $175.00`
`GL-6240`	**Software, SaaS & Cloud Subscriptions**	CRM, OpenAI/Anthropic API, Make/Zapier, Adobe, Microsoft 365, Google	`[ ] No` *(Overhead)*	Flag any new recurring charge or tier jump `> 5.0%`
`GL-6310`	**Advertising & Lead Generation**	Google Local Service Ads, Meta Ads, print mailers, directory fees	`[ ] Optional` *(Tag `Campaign`)*	Reconcile monthly against `Dept 01` CAC scorecard
`GL-6450`	**Shop, Clinic & Office Supplies**	Small tools, cleaning supplies, printer paper, breakroom items	`[ ] No` *(Overhead)*	Flag single receipt `> $250.00` for Amber review
`GL-6999`	**Uncategorized / Suspense (Needs Review)**	Ambiguous vendor name or missing line-item detail	`[X] YES` *(Auto-chase staff member)*	Route to `Prompt 8.5` Monthly Pre-Close Chaser

---

Part 5: Monthly 5-Day Bookkeeping Pre-Close Checklist (`Prompt 8.5`)

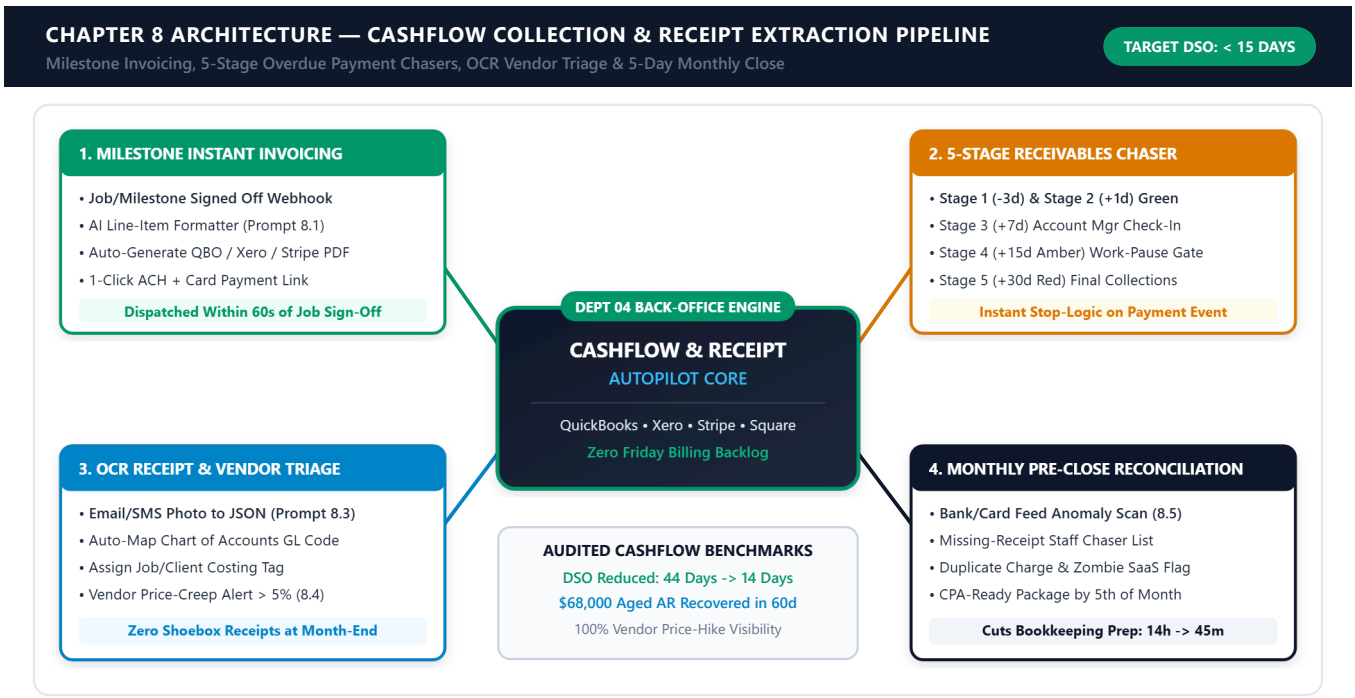

Run this 5-day sequence on **Days 1 through 5 of every month** so your bookkeeper or CPA delivers finalized Profit & Loss, Balance Sheet, and Cashflow statements by the **5th business day**:

- [ ] **Day 1 (Automated Bank/Card Feed Audit — `Prompt 8.5`):** Export the prior month's bank and credit card transactions and match against uploaded receipts in `receipts@yourcompany.com` . Automatically generate the **Staff Missing-Receipt Chaser List** and **Duplicate/Zombie Subscription Report**.
- [ ] **Day 2 (Automated Staff Receipt Collection):** Dispatch individual Slack/SMS prompts to any cardholder with a missing receipt `≥ $25.00` ("*Hi Carlos, please snap a photo of the Oct 19 Home Depot receipt for $142.80 and reply to this text*").
- [ ] **Day 3 (Vendor Price-Creep & AP Reconciliation — `Prompt 8.4`):** Review all flagged Amber vendor bills where unit prices increased by `> 5%` or duplicate invoice numbers were detected before releasing vendor ACH payments.
- [ ] **Day 4 (AR Aging & Bad-Debt Review):** Reconcile all collected Stripe/Square payouts against QuickBooks/Xero invoices, accounting for merchant processing fees automatically.
- [ ] **Day 5 (Executive Financial Package Sign-Off):** Bookkeeper locks the prior month's ledger and delivers the 1-Page Monthly P&L, Gross Margin by Service Line, and 13-Week Cashflow Forecast to the Owner.

Back-Office Autopilot Deployment Sign-Off

- **Milestone Invoice Trigger & `Prompt 8.1` Line-Item Formatter Live:** `[ ] Verified Live`
- **5-Stage Payment Chaser (`Prompt 8.2`) & Webhook Stop-Logic Tested:** `[ ] Verified Live`
- **Receipt OCR Inbox (`Prompt 8.3`) & Price-Creep Detector (`Prompt 8.4`) Active:** `[ ] Verified Live`
- **Sign-Off Date:** `____ / ____ / 2026` | **Owner / Finance Lead Signature:** `_____`

Chapter 8 System Mindmap Quick-Reference Diagram

Interactive Implementation Notes & Owner Sign-Off (Worksheet 08):

Assigned Champion: _____ | Target Go-Live Date: ___/___/2026 | Gate Status: [ ] Green [ ] Amber

Worksheet 9: Team Delegation & SOP Standardization Canvas

Companion to: Chapter 9 — *Internal Team SOPs, Meeting Synthesis & Instant Staff Training Systems*
Framework Reference: *The Living SOP & Voice-to-Checklist Delegation Engine (5-Minute Loom/Voice Capture -> 7-Block Living SOP Compiler -> Internal "Ask-the-SOP" Staff Assistant -> Zero-Drift Meeting Synthesis -> 7-Day New-Hire Certification)*
Department Engine: `Dept 05 — Internal Team SOPs, Delegation & Training`
Estimated Completion Time: 45 Minutes
Interactive Companion: Pre-configured inside the Notion Small Business OS (`06-NOTION-TEMPLATES/`) and the Pro Web App Suite (`07-INTERACTIVE-TOOLS/index.html` — Access Code: `SMALLBIZ-OS-PRO-2026`).

Instructions for the Owner & Operations Manager

The reason most small business owners work 55 to 65 hours a week is not because their employees are lazy—it is because **the company's operating manual lives exclusively inside the owner's head**. Every time a staff member has to knock on your door, call your cell phone from a job site, or message you on Slack to ask *"How do we handle a partial refund?"*, *"Where is the vendor login?"*, or *"What's the checklist for closing the clinic on Friday?"*, your deep-work focus is shattered. Worse, when you ask managers to "write SOPs," nothing gets written because sitting down at a blank document to type step-by-step manuals takes hours nobody has.

Chapter 9 solves this permanently: **you never type an SOP from scratch again**. You simply record a 3-minute screen share (Loom) or voice memo while performing the task once, and `Prompt 9.1` compiles it into a standardized **7-Block Living SOP** indexed inside your internal **"Ask-the-SOP" Staff Bot (`Prompt 9.4`)**. Use this 5-part workbook to prioritize the first 15 tasks you will extract from your head, standardize your 7-Block SOP format, structure voice-to-task delegations, index your staff Q&A vault, and certify new hires in 7 days.

Part 1: Owner Task Delegation & SOP Priority Inventory

List the top 10 to 15 recurring operational tasks or staff questions that currently interrupt your week or require your personal intervention. Score each task to identify your **First 5 Recordings** this week (tasks that take 3 minutes to record and immediately save 1 to 3 hours every single week).

SOP ID	Recurring Task or Frequent Staff Question	Dept (01–05)	Frequency (Daily / Weekly / Monthly)	Mins Per Occurrence	Weekly Owner/Lead Time Drained	Target Delegate Role	3-Min Loom / Voice Recorded?
SOP-01-01	**Missed-Call & Amber Lead Triage:** How front desk reviews and approves custom quote requests	Dept 01	Daily (5x/wk)	15 mins	75 mins/wk	Front Desk / Intake Coord	[ ] Recorded [ ] Approved
SOP-02-01	**3-Tier Proposal Setup & Margin Check:** Generating Core/Pro/Complete quotes from discovery notes	Dept 02	Daily (5x/wk)	20 mins	100 mins/wk	Sales Rep / Estimator	[ ] Recorded [ ] Approved
SOP-03-01	**New Client Kickoff & Folder Provisioning:** Verifying Gate A assets and posting the Delivery Brief	Dept 03	3–5x / week	20 mins	80 mins/wk	Project / Dispatch Coord	[ ] Recorded [ ] Approved
SOP-03-02	**Tier 2 Support Refund & Replacement Approval:** Reviewing photo proof and issuing replacements < $75	Dept 03	Daily (5x/wk)	15 mins	75 mins/wk	Support Specialist	[ ] Recorded [ ] Approved
SOP-03-03	**Opening / Closing Shop, Clinic, or Truck Inspection:** Daily readiness and safety sign-off checklist	Dept 03	Daily (5–6x/wk)	15 mins	90 mins/wk	Lead Tech / Shift Lead	[ ] Recorded [ ] Approved
SOP-04-01	**Completed Job Invoice Dispatch & AR Check:** Formatting job notes into QBO/Stripe invoice line items	Dept 04	Daily (5x/wk)	15 mins	75 mins/wk	Billing / Office Admin	[ ] Recorded [ ] Approved

SOP ID	Recurring Task or Frequent Staff Question	Dept (`01–05`)	Frequency (`Daily / Weekly / Monthly`)	Mins Per Occurrence	Weekly Owner/Lead Time Drained	Target Delegate Role	3-Min Loom / Voice Recorded?
`SOP-04-02`	**Vendor Bill OCR & Price-Creep Review:** Approving staged bills and flagging `> 5%` price hikes	`Dept 04`	Weekly (`Fri`)	`30 mins`	`30 mins/wk`	Bookkeeper / Office Mgr	`[ ] Recorded [ ] Approved`
`SOP-05-01`	**Friday 2:30 PM KPI Data Prep:** Checking exceptions before the 3:00 PM Owner Scorecard runs	`Dept 05`	Weekly (`Fri`)	`20 mins`	`20 mins/wk`	Operations Lead	`[ ] Recorded [ ] Approved`
`SOP-CUS-01`	`_____`	`Dept __`	`_____`	`____ mins`	`____ mins/wk`	`_____`	`[ ] Recorded [ ] Approved`
`SOP-CUS-02`	`_____`	`Dept __`	`_____`	`____ mins`	`____ mins/wk`	`_____`	`[ ] Recorded [ ] Approved`
`SOP-CUS-03`	`_____`	`Dept __`	`_____`	`____ mins`	`____ mins/wk`	`_____`	`[ ] Recorded [ ] Approved`
`SOP-CUS-04`	`_____`	`Dept __`	`_____`	`____ mins`	`____ mins/wk`	`_____`	`[ ] Recorded [ ] Approved`

Part 2: The 7-Block Living SOP Authoring Template (`Prompt 9.1`)

Whenever you or a senior team member record a 3-to-5-minute Loom screen share or voice memo explaining how to perform a task, pass the raw transcript into `Prompt 9.1`. Every SOP stored in your company vault (`06-NOTION-TEMPLATES/` or `12-EDITABLE-OFFICE-SUITE/Word-Docs/`) must conform to this exact **7-Block Living SOP Standard**:

```
================================================================================
STANDARD OPERATING PROCEDURE (7-BLOCK LIVING SOP STANDARD)
SOP ID: {{sop_id}} | Title: {{sop_title}}
Department: {{department}} | Role Owner: {{assigned_role}}
Effective Date: {{date_iso}} | Version: {{version_number}} | Video Link: {{loom_url}}
================================================================================

BLOCK 1: PURPOSE & OPERATIONAL OUTCOME (WHY THIS MATTERS)
- Objective: {{one_sentence_objective}}
- Business Impact if Skipped: {{consequence_of_failure}}
- Target Completion Time: {{estimated_minutes}} Minutes

BLOCK 2: EXACT TRIGGER & TIMING SLA (WHEN TO RUN THIS)
- Trigger Event: {{exact_webhook_status_or_schedule_trigger}}
- Mandatory SLA Window: Must be completed within {{sla_window}} of trigger.

BLOCK 3: REQUIRED TOOLS, LOGINS & PRE-FLIGHT INPUTS
- Software / Systems Needed: {{systems_and_permission_level}}
- Required Inputs Before Starting:
  [ ] 1. {{prerequisite_input_1}}
  [ ] 2. {{prerequisite_input_2}}

BLOCK 4: STEP-BY-STEP EXECUTION CHECKLIST (HOW TO DO IT)
- [ ] Step 1 ({{action_verb_header_1}}): {{exact_clicks_fields_and_actions_1}}
- [ ] Step 2 ({{action_verb_header_2}}): {{exact_clicks_fields_and_actions_2}}
- [ ] Step 3 ({{action_verb_header_3}}): {{exact_clicks_fields_and_actions_3}}
- [ ] Step 4 ({{action_verb_header_4}}): {{exact_clicks_fields_and_actions_4}}
- [ ] Step 5 ({{action_verb_header_5}}): {{exact_clicks_fields_and_actions_5}}

BLOCK 5: QUANTIFIED "DEFINITION OF DONE" (QUALITY VERIFICATION GATE)
This task is NOT complete until all 3 verification checks below are true:
- [ ] QA Check 1: {{measurable_output_check_1}}
- [ ] QA Check 2: {{measurable_output_check_2}}
- [ ] QA Check 3: {{status_updated_and_logged_check_3}}

BLOCK 6: COMMON EDGE CASES & DECISION BOUNDARIES (IF X, DO Y)
- Scenario A ({{edge_case_a}}): {{exact_approved_handling_a}}
- Scenario B ({{edge_case_b}}): {{exact_approved_handling_b}}

BLOCK 7: AMBER / RED ESCALATION BOUNDARY (WHEN TO STOP & ASK)
- Escalate Immediately To: {{escalation_role_and_channel}}
- Hard Stop Conditions: Stop and escalate if dollar impact exceeds ${{dollar_cap}},
  customer sentiment is hostile, or required data is missing after 2 attempts.
================================================================================
```

Part 3: Voice-to-Checklist Ad-Hoc Delegation Contract (`Prompt 9.2`)

Even with a complete SOP library, owners frequently need to delegate one-off projects or custom client requests on the fly. Instead of sending vague 1-line Slack messages ("*Hey Sam, can you take care of the Miller account update?*") that result in misunderstandings, record a 45-second voice note and run it through `Prompt 9.2` to generate a **5-Point Delegation Contract**:

Delegation Element	Bad Ad-Hoc Delegation (Causes Rework)	Studio Voice-to-Checklist Standard (`Prompt 9.2` Output)	Verified in Task Card?
1. Single Named Owner	*"Can somebody in the back check on the parts order?"*	**Assigned To:** `@Marcus_T` (One primary human owner per task—never a group)	`[ ] Yes`
2. Binary Deliverable	*"Work on the Q4 client renewal deck"*	**Deliverable:** 8-slide renewal PDF saved in `Drive/Client_X/04-Deliverables`	`[ ] Yes`
3. Hard Deadline & Time	*"Get this done soon / when you have a chance"*	**Due By:** `Thursday, Oct 29 at 2:00 PM CT`	`[ ] Yes`
4. Decision Authority Tier	Staff doesn't know if they should act or ask first	**Authority Level:** `[ ] Level 1: Research & Recommend` `[ ] Level 2: Draft & Amber Gate` `[ ] Level 3: Execute & Report`	`[ ] Yes`
5. Definition of Done (QA)	Staff says *"Done!"* when only half the steps are finished	**Definition of Done:** 3-item checkbox list that must be checked before marking complete	`[ ] Yes`

Part 4: Internal "Ask-the-SOP" Staff Bot Governance Rules (`Prompt 9.4`)

To cut internal staff interruptions by **70% to 80%**, establish the **"SOP Bot First" Cultural Rule** across your team. Before any team member messages the Owner or Operations Manager with a *"How do I...?"* question, they ask your internal `#ask-the-sop` Slack/Teams/Web assistant (`Prompt 9.4`):

- [ ] **Rule 1 — Closed-World SOP Grounding (`temperature: 0.0`):** The internal staff bot answers *exclusively* from your approved 7-Block Living SOP folder and Single-Source Policy KB. It must cite the exact `SOP-ID` and step number in every reply.
- [ ] **Rule 2 — Zero Guessing on Unindexed Questions:** If a staff member asks a question that is not covered in any existing SOP (`confidence < 0.90`), the bot is forbidden from improvising. Instead, it replies: *"No verified SOP covers this scenario yet. I have tagged `{{department_lead}}` to provide the official rule and auto-create a new SOP."*
- [ ] **Rule 3 — The 60-Second Voice-Note Self-Healing Loop:** When the bot tags the Owner or Manager on an unindexed question, the Owner replies right in the thread with a **60-second voice note**. The automation transcribes the voice note, runs `Prompt 9.1` to generate a new 7-Block SOP draft, and adds it to the vault—ensuring the owner **never answers the same staff question twice**.

Part 5: 7-Day New-Hire Role Certification & Ramp-Up Tracker (`Prompt 9.5`)

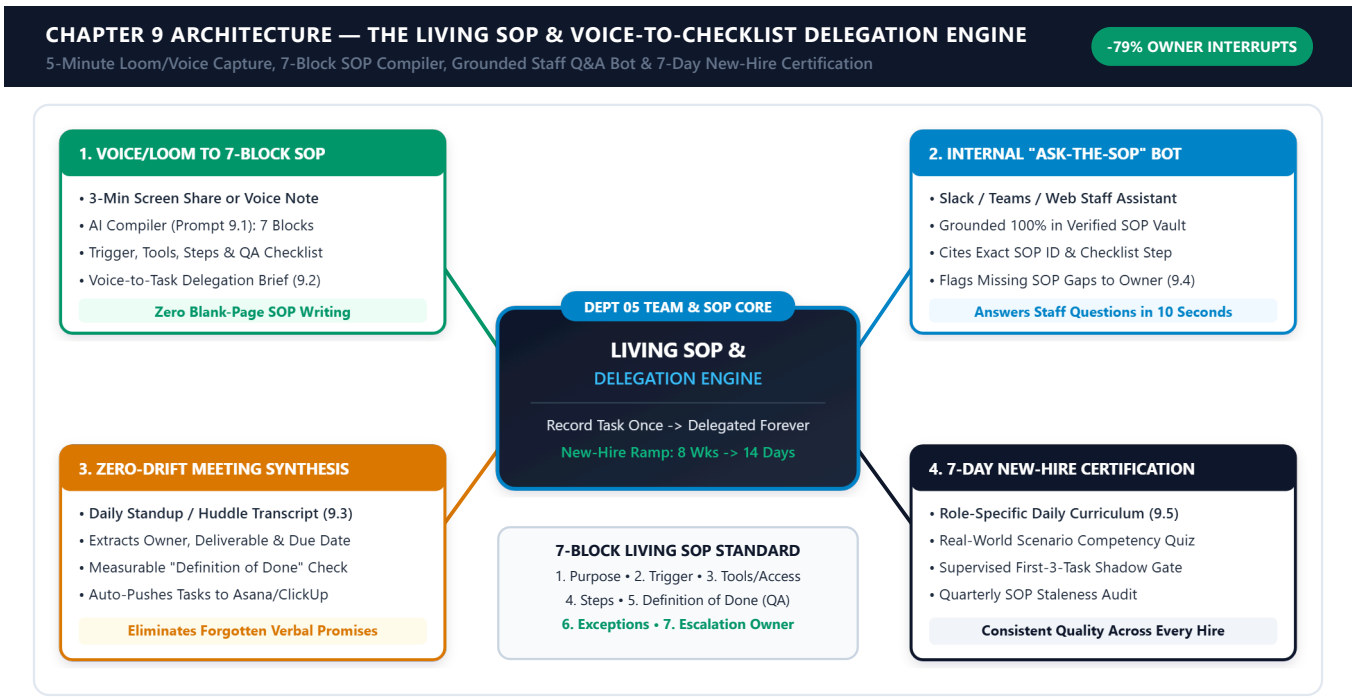

When you hire a new front-desk coordinator, technician, support rep, or account manager, use `Prompt 9.5` to generate a structured **7-Day Role Certification Curriculum** from the 8 to 12 Living SOPs assigned to their role. Track their certification below:

Onboarding Day	Assigned Living SOPs (`SOP-IDs`)	Loom Video + 7-Block SOP Studied?	`Prompt 9.5` Scenario Quiz Score (`Pass ≥ 90%`)	Supervised Shadow Execution (`3 Real Tasks Verified`)	Manager Sign-Off & Certification
Day 1: Core Systems & Safety	`SOP-____` , `SOP-____`	`[ ] Complete`	`____ / 100%`	`[ ] Task 1 [ ] Task 2 [ ] Task 3`	Initials: `_____`
Day 2: Daily Frontline Tasks	`SOP-____` , `SOP-____`	`[ ] Complete`	`____ / 100%`	`[ ] Task 1 [ ] Task 2 [ ] Task 3`	Initials: `_____`
Day 3: Customer Handoffs	`SOP-____` , `SOP-____`	`[ ] Complete`	`____ / 100%`	`[ ] Task 1 [ ] Task 2 [ ] Task 3`	Initials: `_____`
Day 4: Exceptions & Amber Gates	`SOP-____` , `SOP-____`	`[ ] Complete`	`____ / 100%`	`[ ] Task 1 [ ] Task 2 [ ] Task 3`	Initials: `_____`
Day 5: Back-Office & Reporting	`SOP-____` , `SOP-____`	`[ ] Complete`	`____ / 100%`	`[ ] Task 1 [ ] Task 2 [ ] Task 3`	Initials: `_____`
Day 6–7: Full Solo Sprint & QA	*All Role SOPs Combined*	`[ ] Complete`	`____ / 100%`	`10 Consecutive Tasks at 100% QA`	**Certified:** `[ ] YES`

Team SOP & Delegation Engine Sign-Off

Worksheet 10: Friday Owner KPI Scorecard & 90-Day Rollout Tracker

Companion to: Chapter 10 — *The 15-Minute Friday Owner Scorecard & 90-Day Automation Rollout Roadmap*
Framework Reference: *The Weekly Executive Pulse & 90-Day Phased Automation Sprint (12-Metric 5-Department Scorecard -> Friday 3:00 PM AI Variance Brief -> Monday 15-Minute All-Hands Priorities -> 3-Phase 30/60/90-Day Rollout)*
Department Engine: `Dept 05 — Executive Command, Governance & 90-Day Rollout`
Estimated Completion Time: 15 Minutes Weekly (Every Friday at 3:00 PM)
Interactive Companion: Pre-configured inside the Notion Small Business OS (`06-NOTION-TEMPLATES/`), the 8-Tab Excel Command Center (`06-NOTION-TEMPLATES/Spreadsheets/`), and the Pro Web App Suite (`07-INTERACTIVE-TOOLS/index.html` — Access Code: `SMALLBIZ-OS-PRO-2026`).

Instructions for the Managing Owner & Executive Team

When you automate lead capture (`Dept 01`), quoting (`Dept 02`), onboarding, support, and reviews (`Dept 03`), invoicing and bookkeeping prep (`Dept 04`), and team SOPs (`Dept 05`), your role fundamentally changes. You stop operating as the chief firefighter, human router, and copy-paste clerk—and you step into the seat of the **Chief Operating Architect**.

To govern an automated small business in **15 minutes per week**, you need two instruments: 1. **The 15-Minute Friday Owner Scorecard (`Part 1 & Part 2`):** Twelve leading and lagging operational metrics across all five departments that automatically compile every Friday at 3:00 PM (`Prompt 10.1`), flagging any **Amber** or **Red** variance so you walk into Monday morning's 15-minute team huddle with three crystal-clear priorities (`Prompt 10.5`). 2. **The 90-Day Phased Rollout Tracker (`Part 3 & Part 4`):** A zero-overwhelm, week-by-week implementation schedule (`Prompt 10.2`) that sequences the entire Operating System across three 30-day phases so you never disrupt daily revenue while upgrading your company.

Part 1: The 12-Metric Friday Owner Executive Scorecard Grid (`Prompt 10.1`)

Review this 12-metric table every Friday at 3:00 PM. Your automation bridge pulls the current week's numbers from your CRM, calendar, helpdesk, and accounting software and passes them into `Prompt 10.1` to assign a **Green (On Target)**, **Amber (10%–20% Drift — Assign Monday Fix)**, or **Red (>20% Miss — Immediate Root-Cause Intervention)** status.

KPI #	Dept	Executive Metric Name	Green Zone Target	Amber Zone Threshold	Red Zone Threshold	Baseline (Wk 0)	Wk 4 Actual	Wk 8 Actual	Wk 12 Actual
KPI-01	Dept 01	**Total Qualified Inbound Leads** *(Calls + Web + SMS + DM)*	≥ ____ / wk *(4-Wk Rolling Target)*	10%–20% below 4-wk average	> 20% drop below 4-wk average	_____	_____	_____	_____
KPI-02	Dept 01	**Median Speed-to-Lead** *(Seconds to First Response)*	**< 60 Seconds** *(24/7/365)*	61 – 300 Seconds (1–5 mins)	**> 300 Seconds** (> 5 mins)	_____	_____	_____	_____
KPI-03	Dept 01	**Missed-Call SMS Recovery Rate** *(% Replied & Qualified)*	**≥ 65.0%** of missed calls	45.0% – 64.9% recovered	**< 45.0%** recovered	_____%	_____%	_____%	_____%
KPI-04	Dept 02	**Total 3-Tier Quotes Dispatched** *(Dollar Volume & Count)*	≥ $_____ (____ quotes/wk)	10%–20% below weekly quota	> 20% below weekly quota	$_____	$_____	$_____	$_____
KPI-05	Dept 02	**Quote Turnaround Time** *(Discovery to Sent Proposal)*	**< 2 Hours** *(< 15m AI Draft)*	2 – 12 Business Hours	**> 24 Hours**	_____h	_____h	_____h	_____h
KPI-06	Dept 02	**14-Day Quote-to-Close Rate** *(% Signed + Deposit Paid)*	**≥ 38.0%** *(Or +10% vs Base)*	28.0% – 37.9% close rate	**< 28.0%** close rate	_____%	_____%	_____%	_____%
KPI-07	Dept 03	**Onboarding Kickoff Cycle Time** *(Deposit to Verified Ready)*	**< 36 Hours** (0% Unprepared)	36 – 72 Hours	**> 72 Hours** or Rework Spike	_____h	_____h	_____h	_____h

KPI #	Dept	Executive Metric Name	Green Zone Target	Amber Zone Threshold	Red Zone Threshold	Baseline (Wk 0)	Wk 4 Actual	Wk 8 Actual	Wk 12 Actual
KPI-08	Dept 03	**Tier 1 AI Support Auto-Resolution** *(% Resolved < 30s + CSAT)*	**60%–75% Auto** & CSAT ≥ 95%	45%–59% Auto or CSAT 90%–94%	**< 45% Auto** or CSAT < 90%	_____%	_____%	_____%	_____%
KPI-09	Dept 03	**Net New 5★ Reviews & Recall Bookings** *(Weekly Reputation & LTV)*	**≥ ____ Reviews/wk** & $_____ Recall	1 review/wk or < 8% recall	**0 new reviews** or Public 1★	_____	_____	_____	_____
KPI-10	Dept 04	**Weekly Cash Collected ($)** *(% of Billed Revenue Collected)*	**≥ 95%** of weekly billed	80% – 94% collection ratio	**< 80%** collection ratio	$_____	$_____	$_____	$_____
KPI-11	Dept 04	**Overdue AR (>15 Days) & DSO** *(Trapped Working Capital)*	**DSO ≤ 15 Days** & AR >15d < 5%	DSO 16–28 Days	**DSO > 28 Days**	____ d	____ d	____ d	____ d
KPI-12	Dept 05	**Owner Weekly Hours & System Health** *(Hours Worked & Exceptions)*	**≤ 35 Hrs/Wk** & 0 Red Errors	36 – 45 Hrs/Wk	**> 45 Hrs/Wk** or Webhook Down	_____ h	_____ h	_____ h	_____ h

Part 2: Weekly Variance Root-Cause & Monday Action Log (Prompts 10.1 & 10.5)

Every Friday at 3:00 PM, after reading the 1-page AI Executive Brief generated by Prompt 10.1, lock in **at most 3 corrective actions** for Monday morning's 15-minute team huddle (Prompt 10.5):

```
═══════════════════════════════════════════════════════════════════════
FRIDAY 3:00 PM OWNER COMMAND BRIEF & MONDAY ACTION LOG
Week Ending: ____ / ____ / 2026 | Reviewed By: _____________________________
═══════════════════════════════════════════════════════════════════════
```

```
1. TOP WIN OF THE WEEK (RECOGNIZE IN MONDAY HUDDLE):
   - Department & Metric: _____
   - Team Member(s) to Praise: _____

2. FLAGGED AMBER / RED VARIANCES (MAX 3):
   - Variance #1 (KPI-__): _____ | Root Cause: _____
   - Variance #2 (KPI-__): _____ | Root Cause: _____
   - Variance #3 (KPI-__): _____ | Root Cause: _____

3. THE 3 MONDAY MORNING TEAM PRIORITIES (GENERATED VIA PROMPT 10.5):
   [ ] Priority 1: _____ | Owner: _____ | Due: Wed 5:00 PM
   [ ] Priority 2: _____ | Owner: _____ | Due: Thu 5:00 PM
   [ ] Priority 3: _____ | Owner: _____ | Due: Fri 2:00 PM

4. AUTOMATION & SOP FLYWHEEL UPDATES THIS FRIDAY (15 MINS):
   [ ] Dead-Letter / Exception Queue Cleared (`0` unresolved webhook errors)
   [ ] Added `____` new FAQ policy chunks from Tier 2 support edits (`Prompt 6.1`)
   [ ] Recorded `____` new 3-minute Loom/Voice SOPs for staff questions (`Prompt 9.1`)
================================================================================
```

Part 3: Complete 90-Day Phased Automation Sprint Tracker (`Prompt 10.2`)

Never try to build all 10 chapters simultaneously on a single Tuesday. Follow this battle-tested **30 / 60 / 90-Day Phased Rollout Roadmap** (spending just **3 to 4 hours per week**) so every workflow stabilizes and generates cash before you layer on the next module.

Phase I: Days 1–30 — Revenue Defense, Safety Gates & Speed-to-Lead (`Chapters 1, 2, 3, 4`)

- **Primary Goal:** Stop inbound lead leakage, enforce human-in-the-loop safety, and lift quote-to-close conversion by 25%–40%.
- [ ] **Week 1 (Audit & Architecture — `Chapters 1 & 2`):** Complete the 5-Day Time & Lead-Leak Audit (`Worksheet 1`), calculate your CMF, score workflows on the `A.U.T.O.` Matrix, and configure your Green/Amber/Red `T.R.A.V.` Risk Gates and `#amber-approvals` Slack/Teams channel (`Worksheet 2`).
- [ ] **Week 2 (60-Second Multi-Channel Lead Router — `Chapter 3`):** Deploy the `I.N.S.T.A.N.T.` Lead Router across web forms, Google LSA, and social DMs (`Prompts 3.2 & 3.3`), delivering sub-60-second responses and instant calendar booking links (`Worksheet 3`).
- [ ] **Week 3 (Missed-Call SMS Concierge & Voice-to-CRM — `Chapter 3`):** Activate instant missed-call text-back (`Prompt 3.1`) with A2P 10DLC compliance and connect voice-note discovery extraction (`Prompt 3.5`) into your CRM.
- [ ] **Week 4 (3-Option Instant Quoting & 14-Day Follow-Up — `Chapter 4`):** Standardize your Good-Better-Best (`Core / Pro / Complete`) pricebook (`Prompt 4.1`), activate the gross-margin validator (`Prompt 4.2`), and turn on the 5-touch 14-day quote nurture sequence with instant stop-on-reply (`Prompt 4.3` & `Worksheet 4`).

- **Day 30 Milestone Sign-Off:** Speed-to-Lead `< 60s` verified | Quote follow-up running | **Estimated Weekly Time Saved:** `6–8 Hours/Week`.

Phase II: Days 31–60 — Frictionless Fulfillment, 24/7 Support & Cashflow (`Chapters 5, 6, 7, 8`)

- **Primary Goal:** Eliminate onboarding rework, automate 65%+ of support volume, multiply 5-star Google reviews, and cut DSO below 15 days.
- [ ] **Week 5 (Zero-Drop Customer Onboarding Protocol — `Chapter 5`):** Connect Stripe/Square/QBO deposit webhooks to auto-create client folders, send the 15-second Welcome Packet (`Prompt 5.2`), enforce Gate A asset completeness chasers (`Prompt 5.3`), and compile the 1-Page Internal Delivery Brief (`Prompt 5.1` & `Worksheet 5`).
- [ ] **Week 6 (The 3-Tier AI Customer Support Shield — `Chapter 6`):** Compile your 25-chunk Single-Source Knowledge Base (`Prompt 6.1`), connect read-only order/booking lookups, and activate Tier 1 autonomous replies (`Prompt 6.3`), Tier 2 context whispers (`Prompt 6.4`), and Tier 3 Red-Zone bot suppression (`Prompt 6.5` & `Worksheet 6`).
- [ ] **Week 7 (The R.E.V.I.E.W. & 90-Day Win-Back Flywheel — `Chapter 7`):** Launch the post-service 1-click Sentiment Pulse (`Prompt 7.1`), `< 60-minute` private service recovery (`Prompt 7.3`), 2-hour SEO review responder (`Prompt 7.2`), and 60/90/180-day dormant customer recall sequence (`Prompt 7.4` & `Worksheet 7`).
- [ ] **Week 8 (Milestone Invoicing & 5-Stage AR Chasers — `Chapter 8`):** Turn on instant milestone invoice drafting (`Prompt 8.1`) and the 5-stage polite-to-firm overdue payment chaser sequence (`Prompt 8.2`) with instant webhook stop-logic (`Worksheet 8`).
- **Day 60 Milestone Sign-Off:** Tier 1 Support `≥ 60%` auto-resolved | DSO `< 18 days` | **Cumulative Weekly Time Saved:** `15–20 Hours/Week`.

Phase III: Days 61–90 — Back-Office Reconciliation, Living SOPs & Owner Command (`Chapters 8, 9, 10`)

- **Primary Goal:** Automate receipt/vendor triage, extract the operations manual from the owner's head, and lock in the 15-Minute Friday Scorecard.
- [ ] **Week 9 (OCR Receipt Triage & 5-Day Monthly Close — `Chapter 8`):** Launch `receipts@yourcompany.com` with `Prompt 8.3` GL categorization, `Prompt 8.4` vendor price-creep (`> 5%`) alerts, and `Prompt 8.5` monthly pre-close missing-receipt chasers.
- [ ] **Week 10 (5-Minute Voice-to-SOP Vault & Delegation — `Chapter 9`):** Record your top 15 recurring tasks on Loom/voice, compile them into 7-Block Living SOPs (`Prompt 9.1`), and enforce the 5-point Voice-to-Checklist delegation standard (`Prompt 9.2` & `Worksheet 9`).
- [ ] **Week 11 (Internal "Ask-the-SOP" Bot & 7-Day New-Hire Certification — `Chapter 9`):** Deploy your grounded internal `#ask-the-sop` staff assistant (`Prompt 9.4`), connect daily huddle action-item synthesis (`Prompt 9.3`), and build your 7-day role certification quizzes (`Prompt 9.5`).
- [ ] **Week 12 (The 15-Minute Friday Owner Scorecard & Quarterly Audit — `Chapter 10`):** Automate the Friday 3:00 PM 12-Metric Executive Brief (`Prompt 10.1`), Monday 15-Minute Huddle Priorities (`Prompt`

`10.5`), and Monthly/Quarterly ROI & Governance Audits (`Prompts 10.3 & 10.4`).

- **Day 90 Milestone Sign-Off:** All 5 Department Engines live | Owner working `≤ 35 hrs/wk` | **Cumulative Weekly Time Saved:** `22–32 Hours/Week`.

Part 4: Quarterly Automation ROI, Labor Savings & Tool-Stack Audit (`Prompt 10.3`)

Complete this return-on-investment ledger at Day 30, Day 60, and Day 90 (or pass your metrics into `Prompt 10.3`) to verify the exact net dollar contribution of your Small Business AI Automation Operating System:

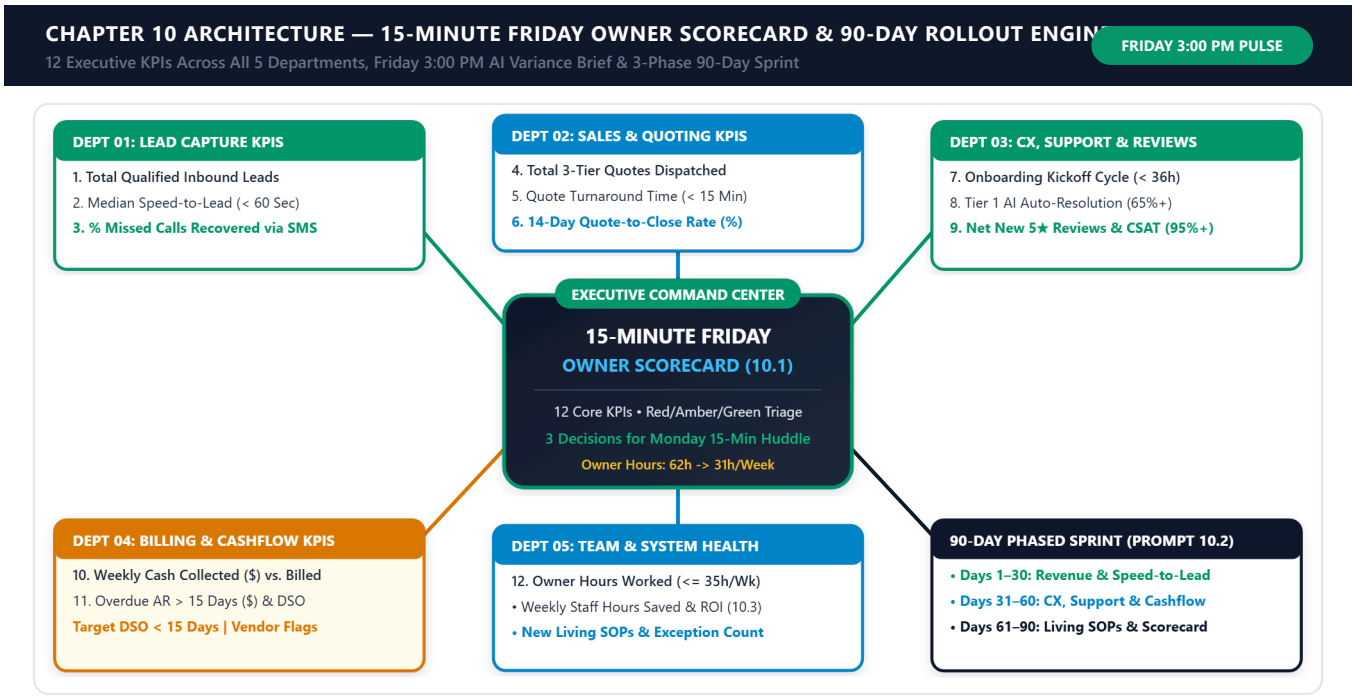

Value Driver Category	Calculation Formula	Day 30 Actual	Day 60 Actual	Day 90 Actual	Annualized Run-Rate (`Day 90 x 12`)
1. Owner Hours Reclaimed (`$`)	`Owner Hrs Saved/Mo x Owner Hourly Rate ($____)`	`$_____`	`$_____`	`$_____`	`$_____ / yr`
2. Staff Admin Hours Reclaimed (`$`)	`Staff Hrs Saved/Mo x Blended Wage ($____)`	`$_____`	`$_____`	`$_____`	`$_____ / yr`
3. Recovered Speed-to-Lead & Quote Revenue	`Net New Closed Deals Attributed x Gross Margin %`	`$_____`	`$_____`	`$_____`	`$_____ / yr`
4. Captured Scope Change Orders & Recall LTV	`Change Orders (5.5) + 90d Win-Back Bookings (7.4)`	`$_____`	`$_____`	`$_____`	`$_____ / yr`
5. Working Capital & Vendor Overcharge Saved	`AR Recovered + Caught Vendor Hikes + Cut Zombie SaaS`	`$_____`	`$_____`	`$_____`	`$_____ / yr`
6. Total Monthly AI + Automation Tool Cost	`-(CRM + Make/Zapier/n8n + LLM API Spend)`	`-$_____`	`-$_____`	`-$_____`	`-$_____ / yr`
NET OPERATING PROFIT IMPACT (`$` & `ROI Multiple`)	`Total Value Generated - Total Tool Spend`	**`$_____`**	**`$_____`**	**`$_____`**	**`$_____ / yr (____x ROI)`**
